Before we begin

- Close all ‘Parked’ Applications: If you are using iOS 5 or above, other applications may be open in the background and some may be using memory or processor resources. To close them, double tap the Home button on your iPad. This brings up a list of all open applications. Swipe up to close them.

- If you find that the **pro**create is laggy close all apps and re start your iPad.

- Make sure you have downloaded and have signed in to dropbox.

If you have not already imported the landscape into your photo album download the photo from airdrop now.

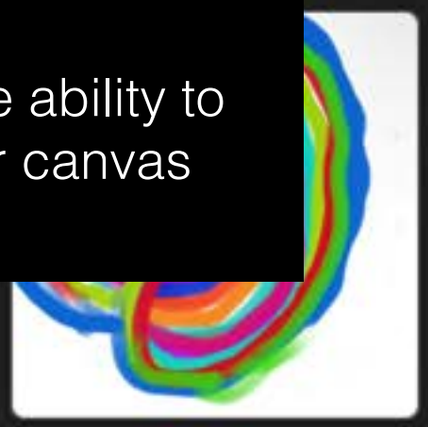
Note:

- If you were to set up your file to be print ready, select Create Custom Size and put in your canvas size in cm or mm.
- You will need to allow a bit more to your canvas size to allow for it to wrap around.
- Set your DPI to no more than 100. Large canvases will not need a high DPI.
- If your canvas is large you will notice you will have the ability to create less layers. The more memory you use for your canvas the less layers you will be able to create.

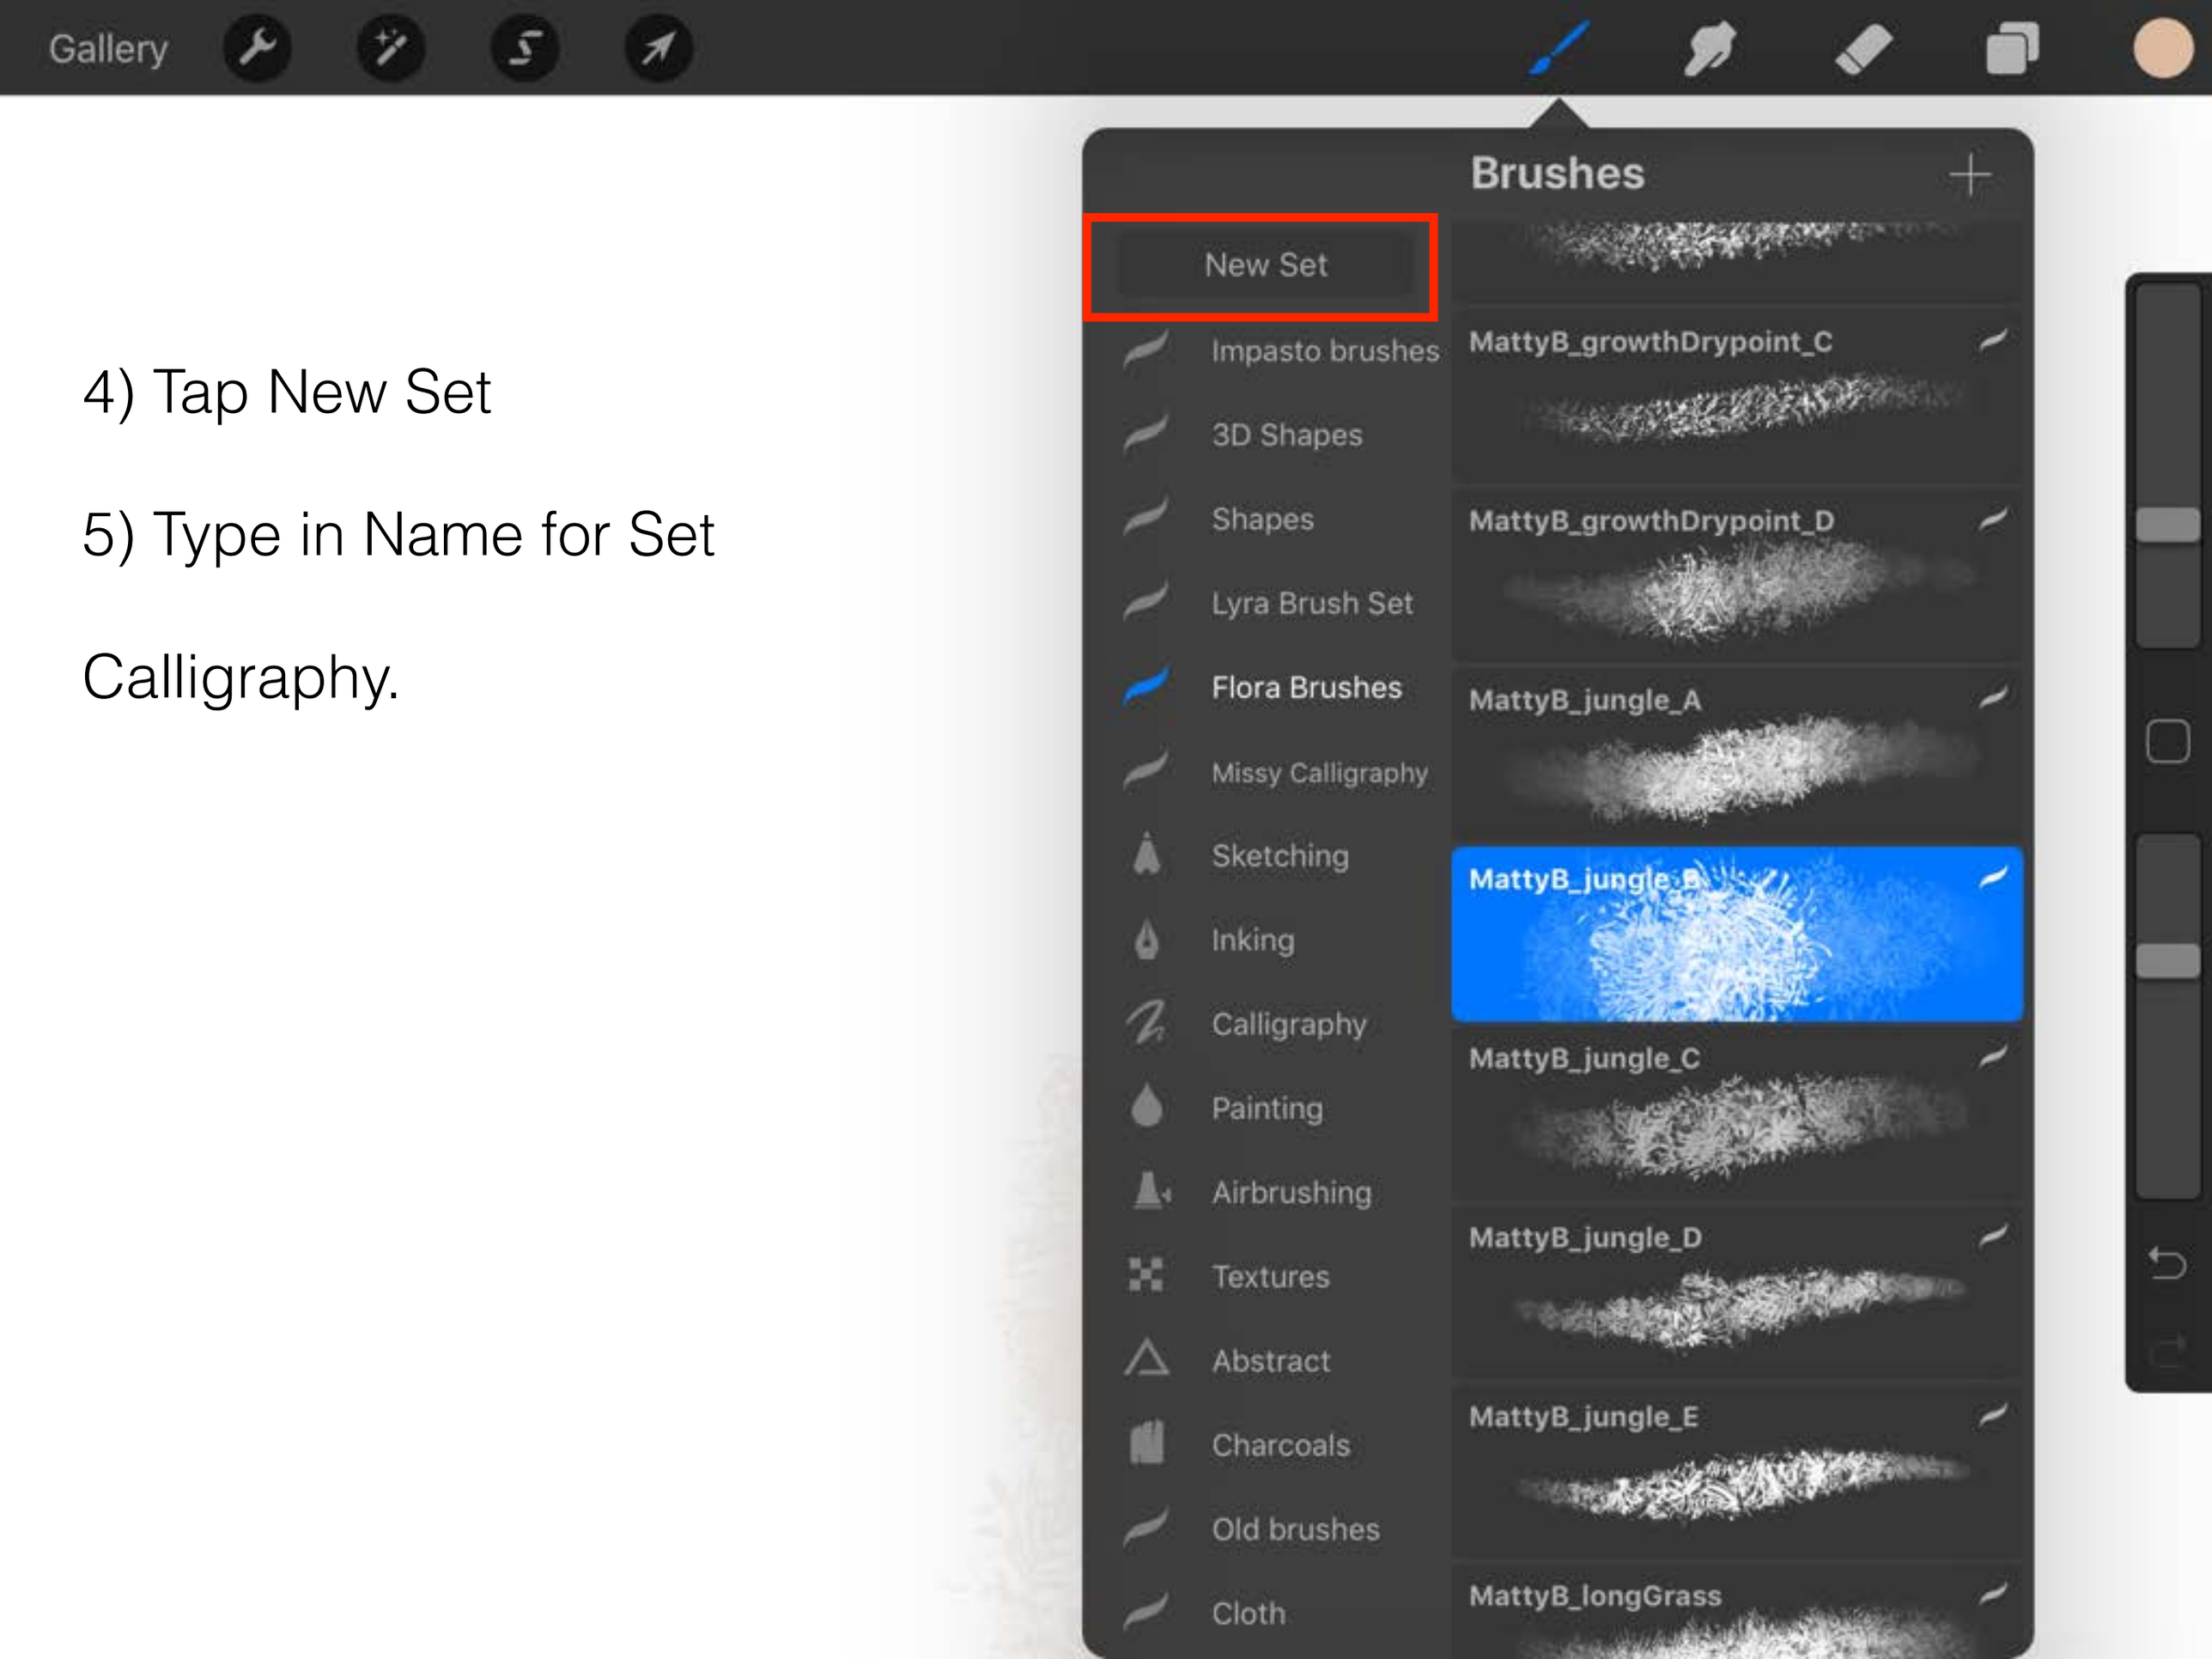


3) Tap the brush icon

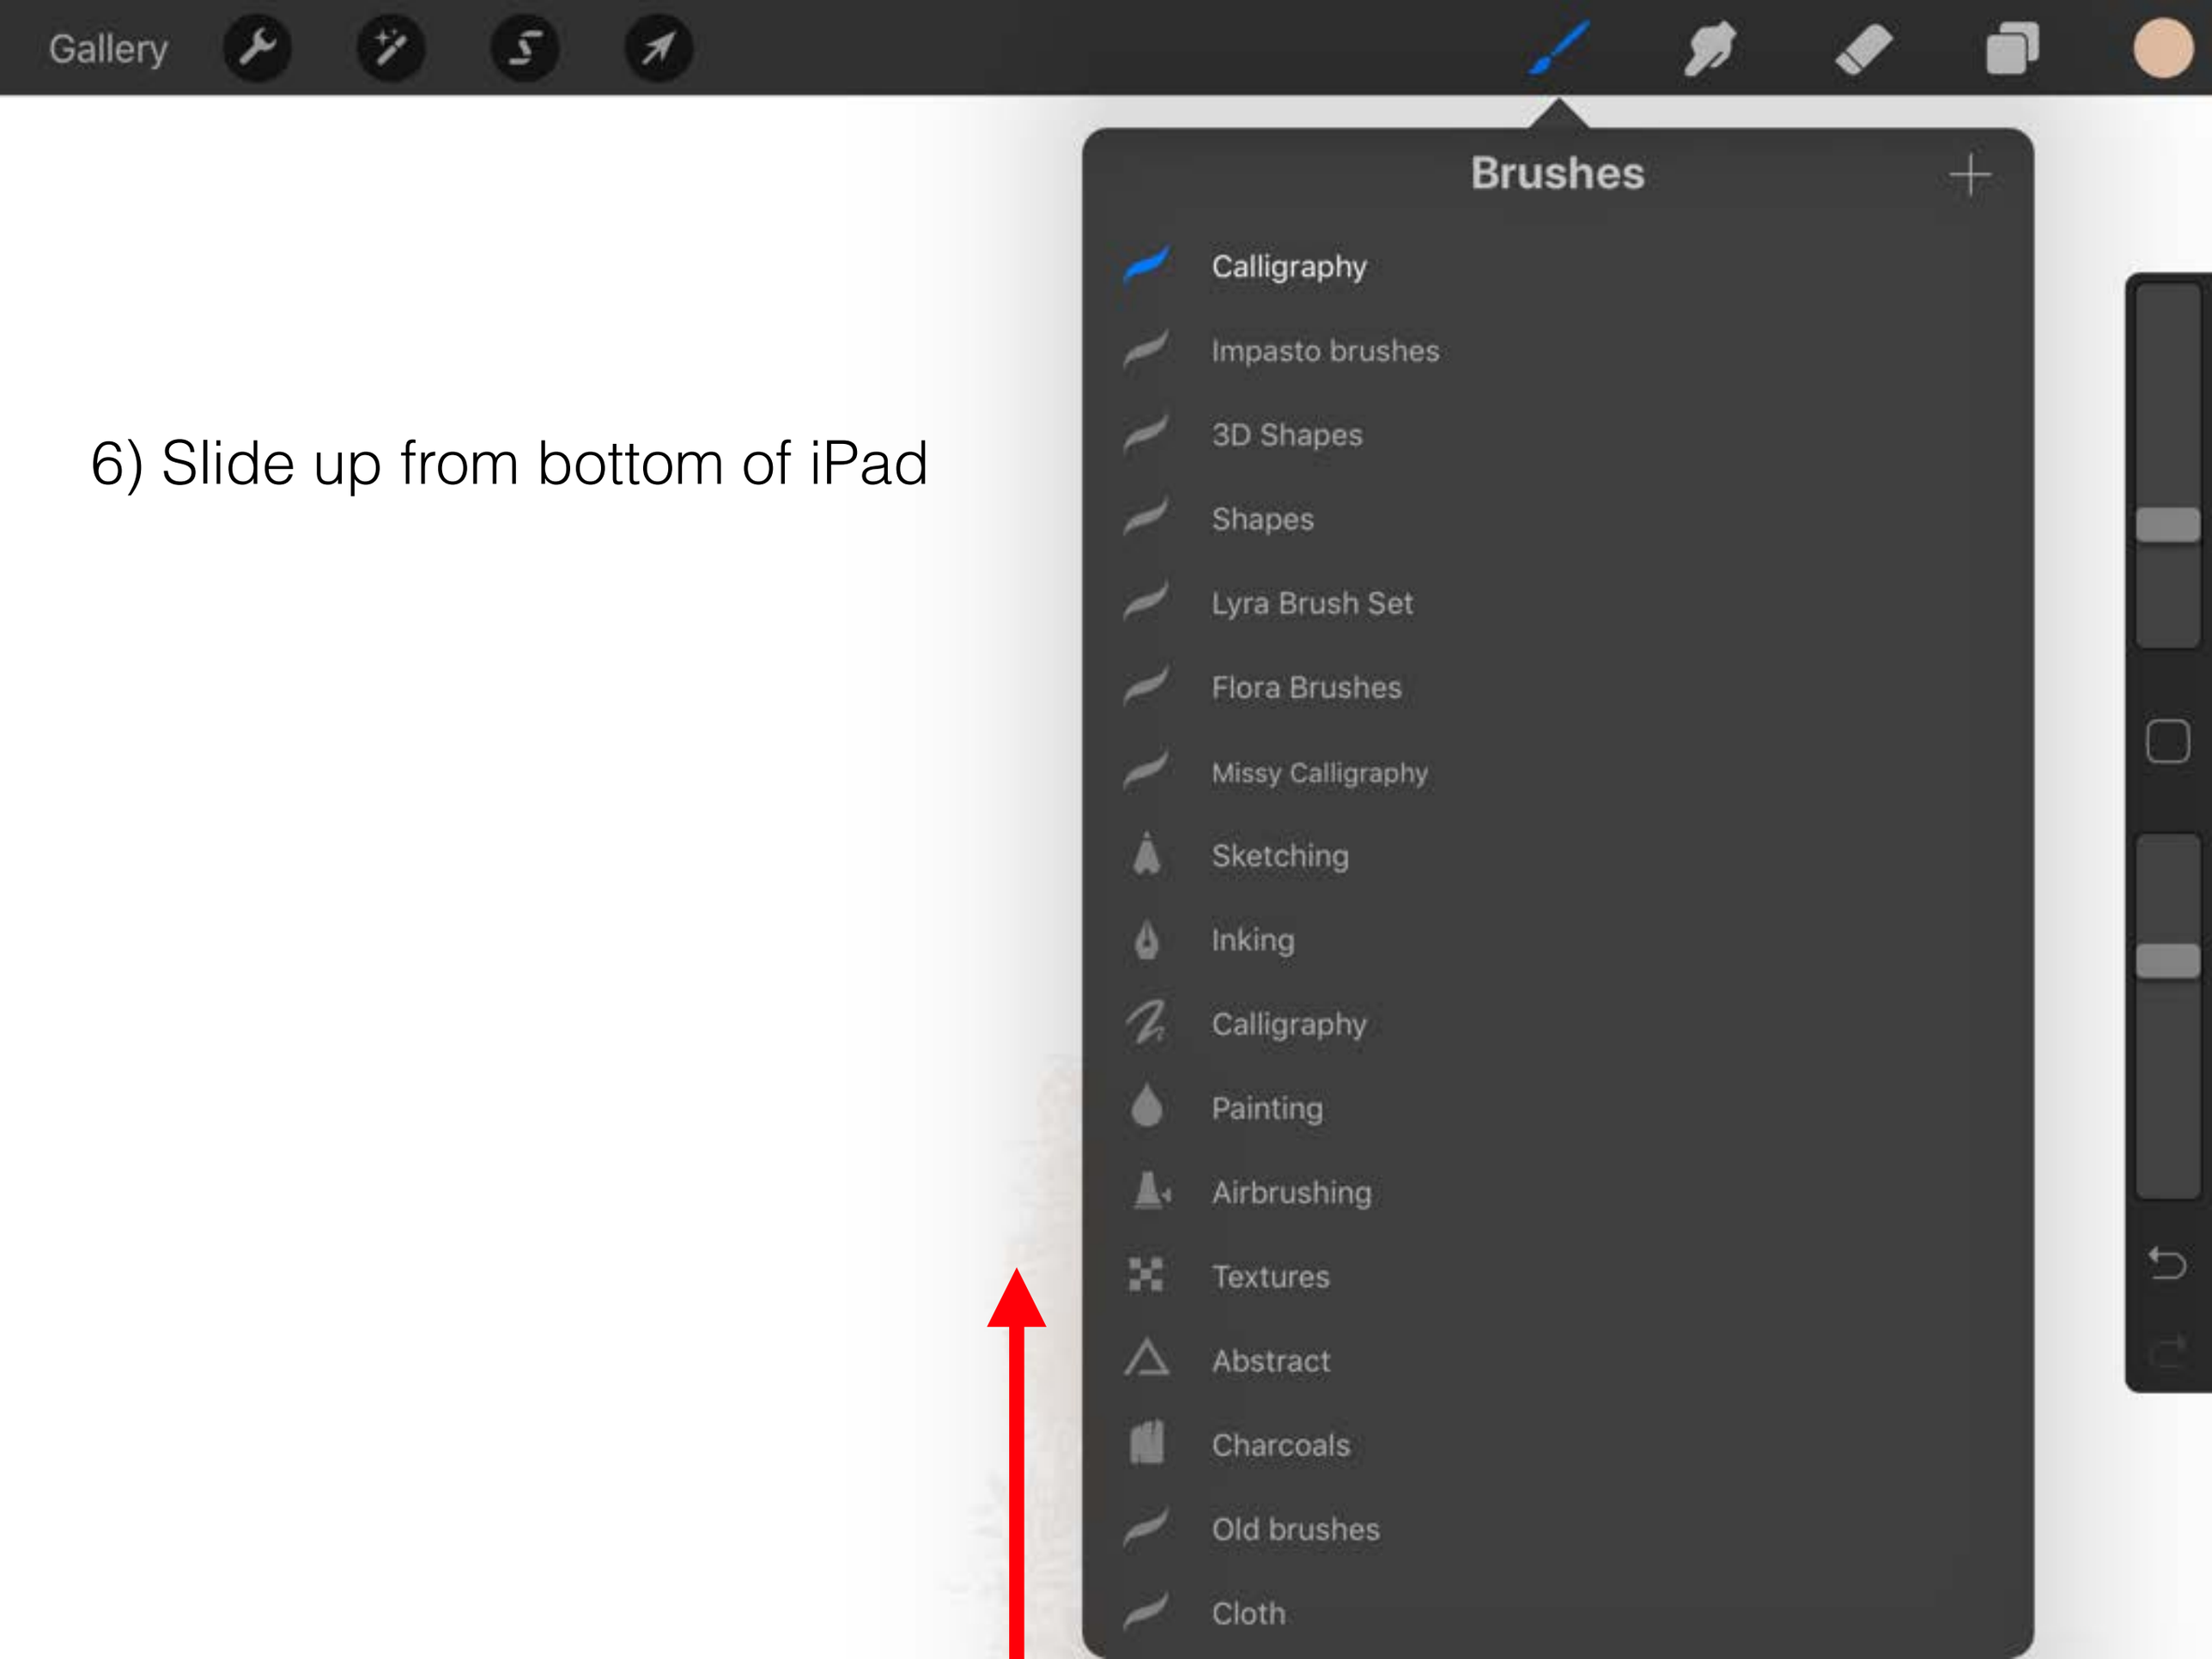
4) Tap New Set

5) Type in Name for Set

Calligraphy.

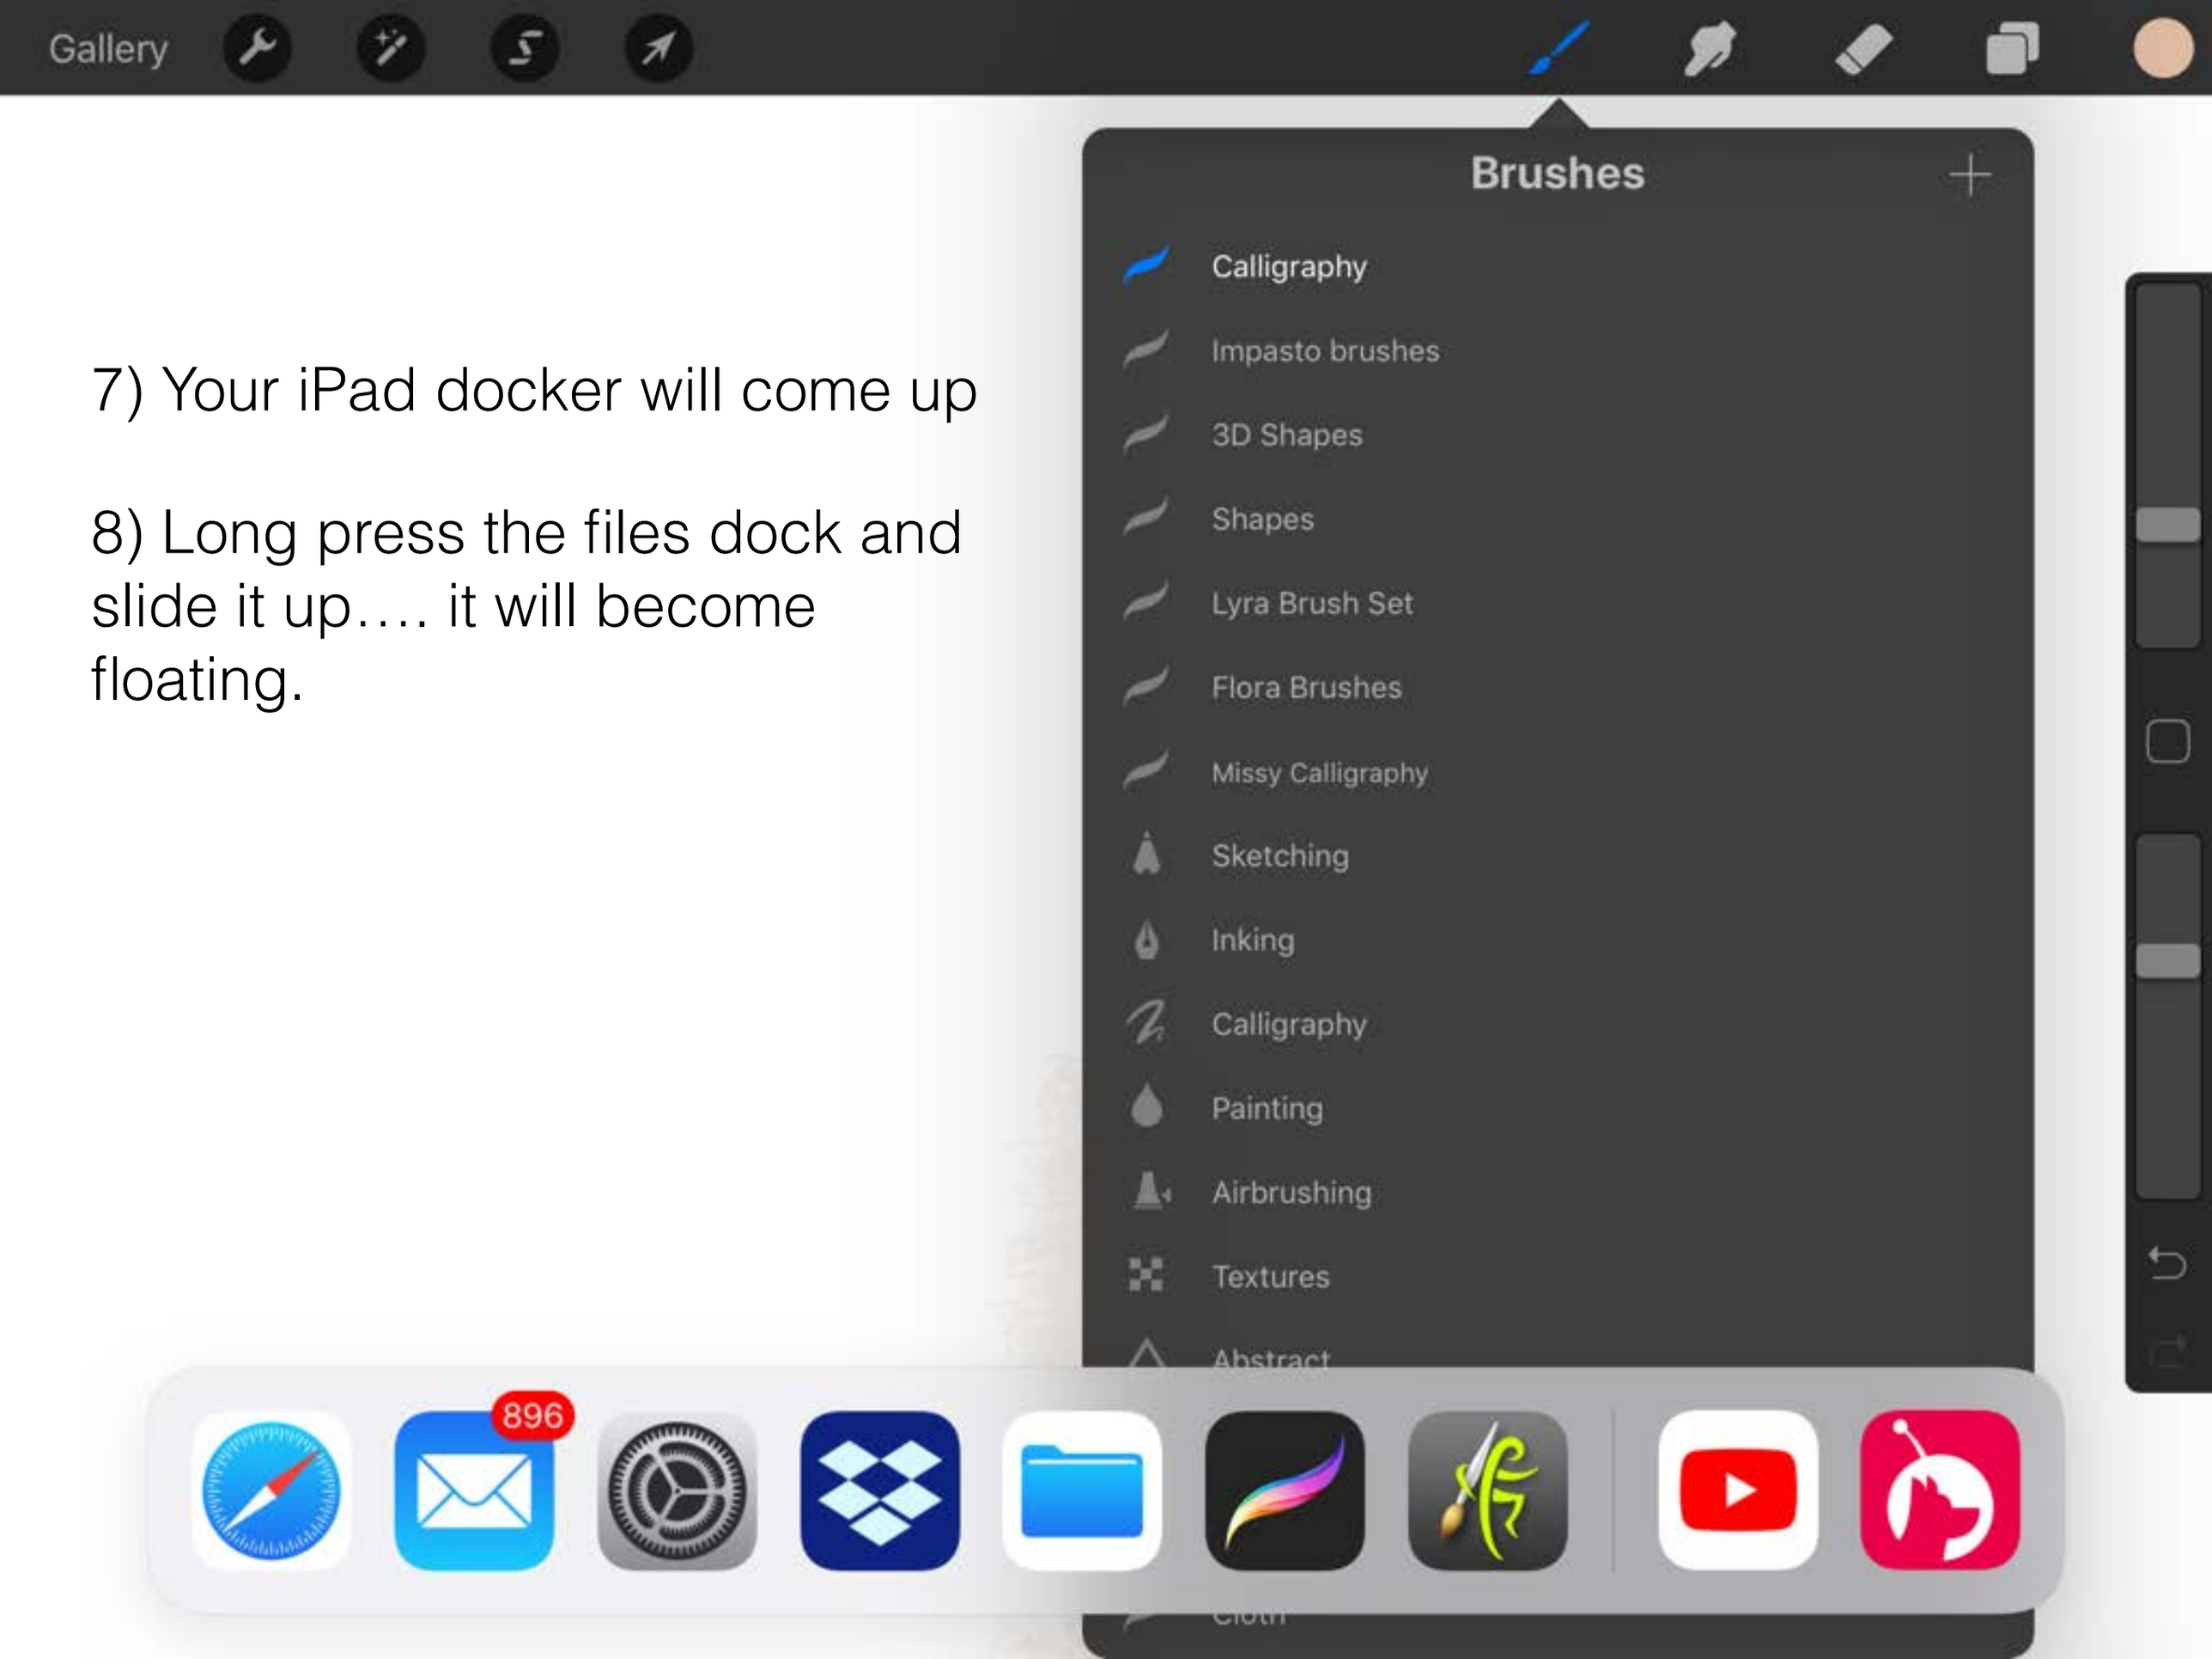


6) Slide up from bottom of iPad

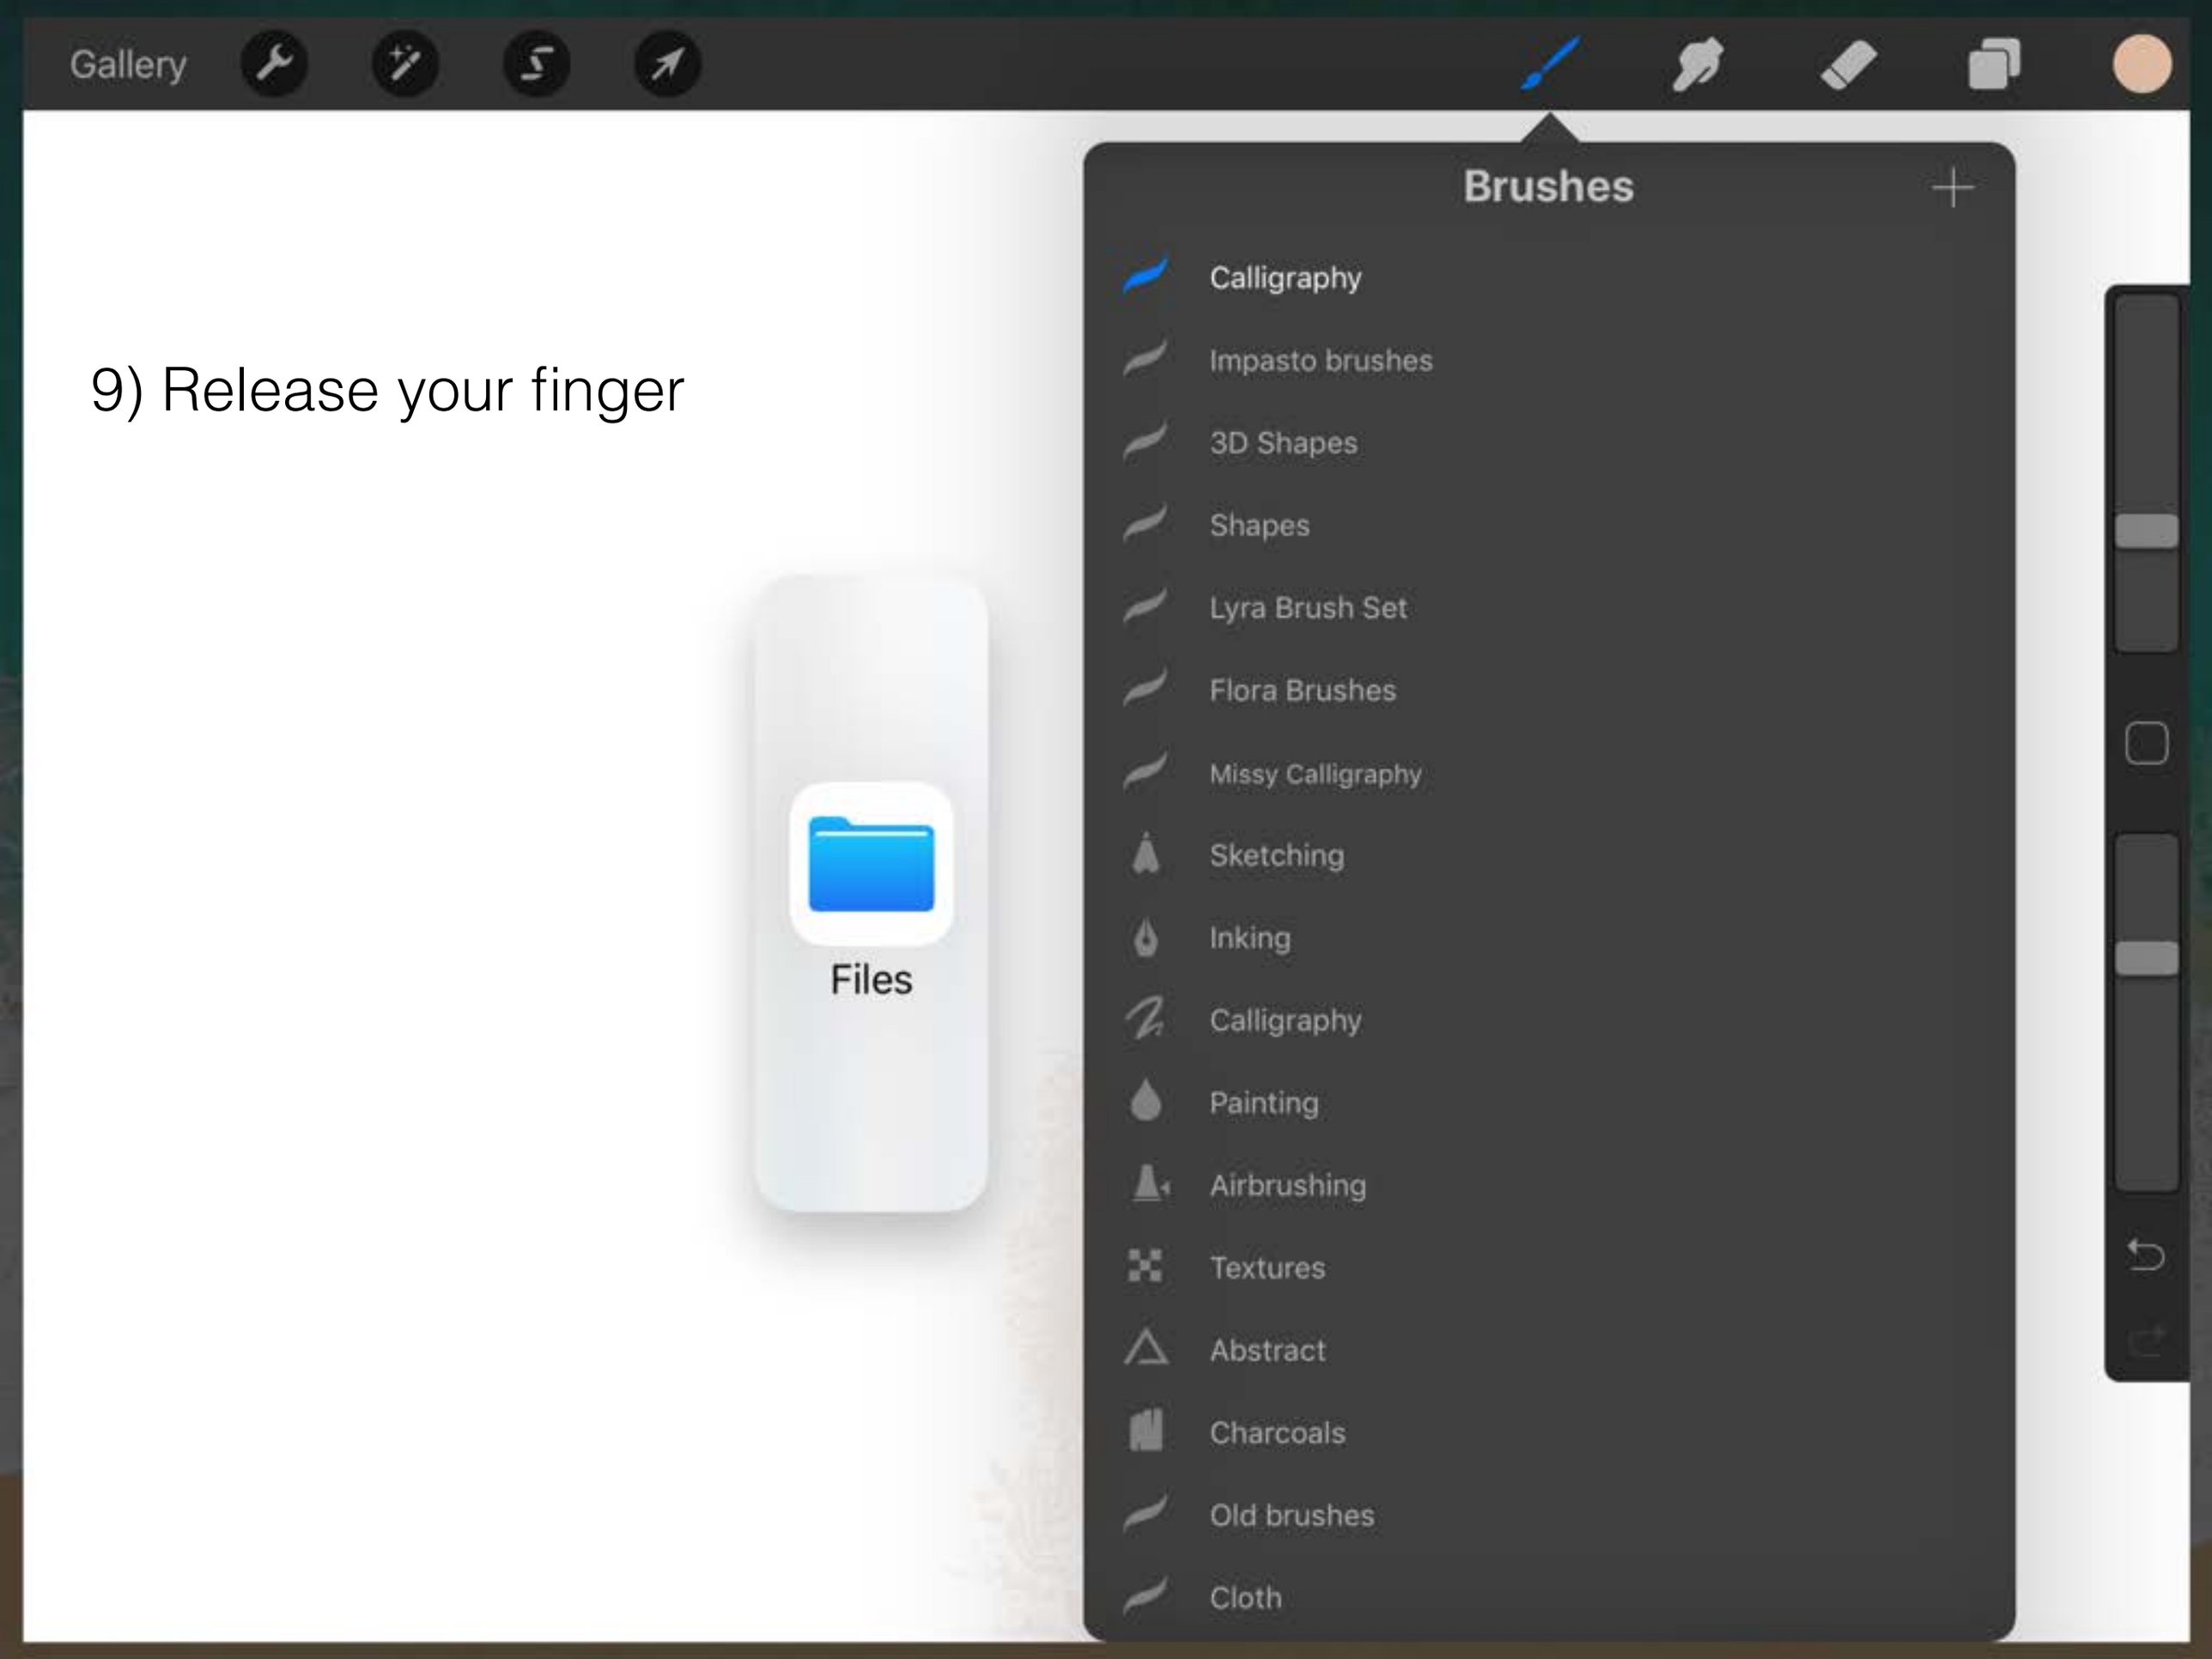


7) Your iPad docker will come up

8) Long press the files dock and slide it up…. it will become floating.

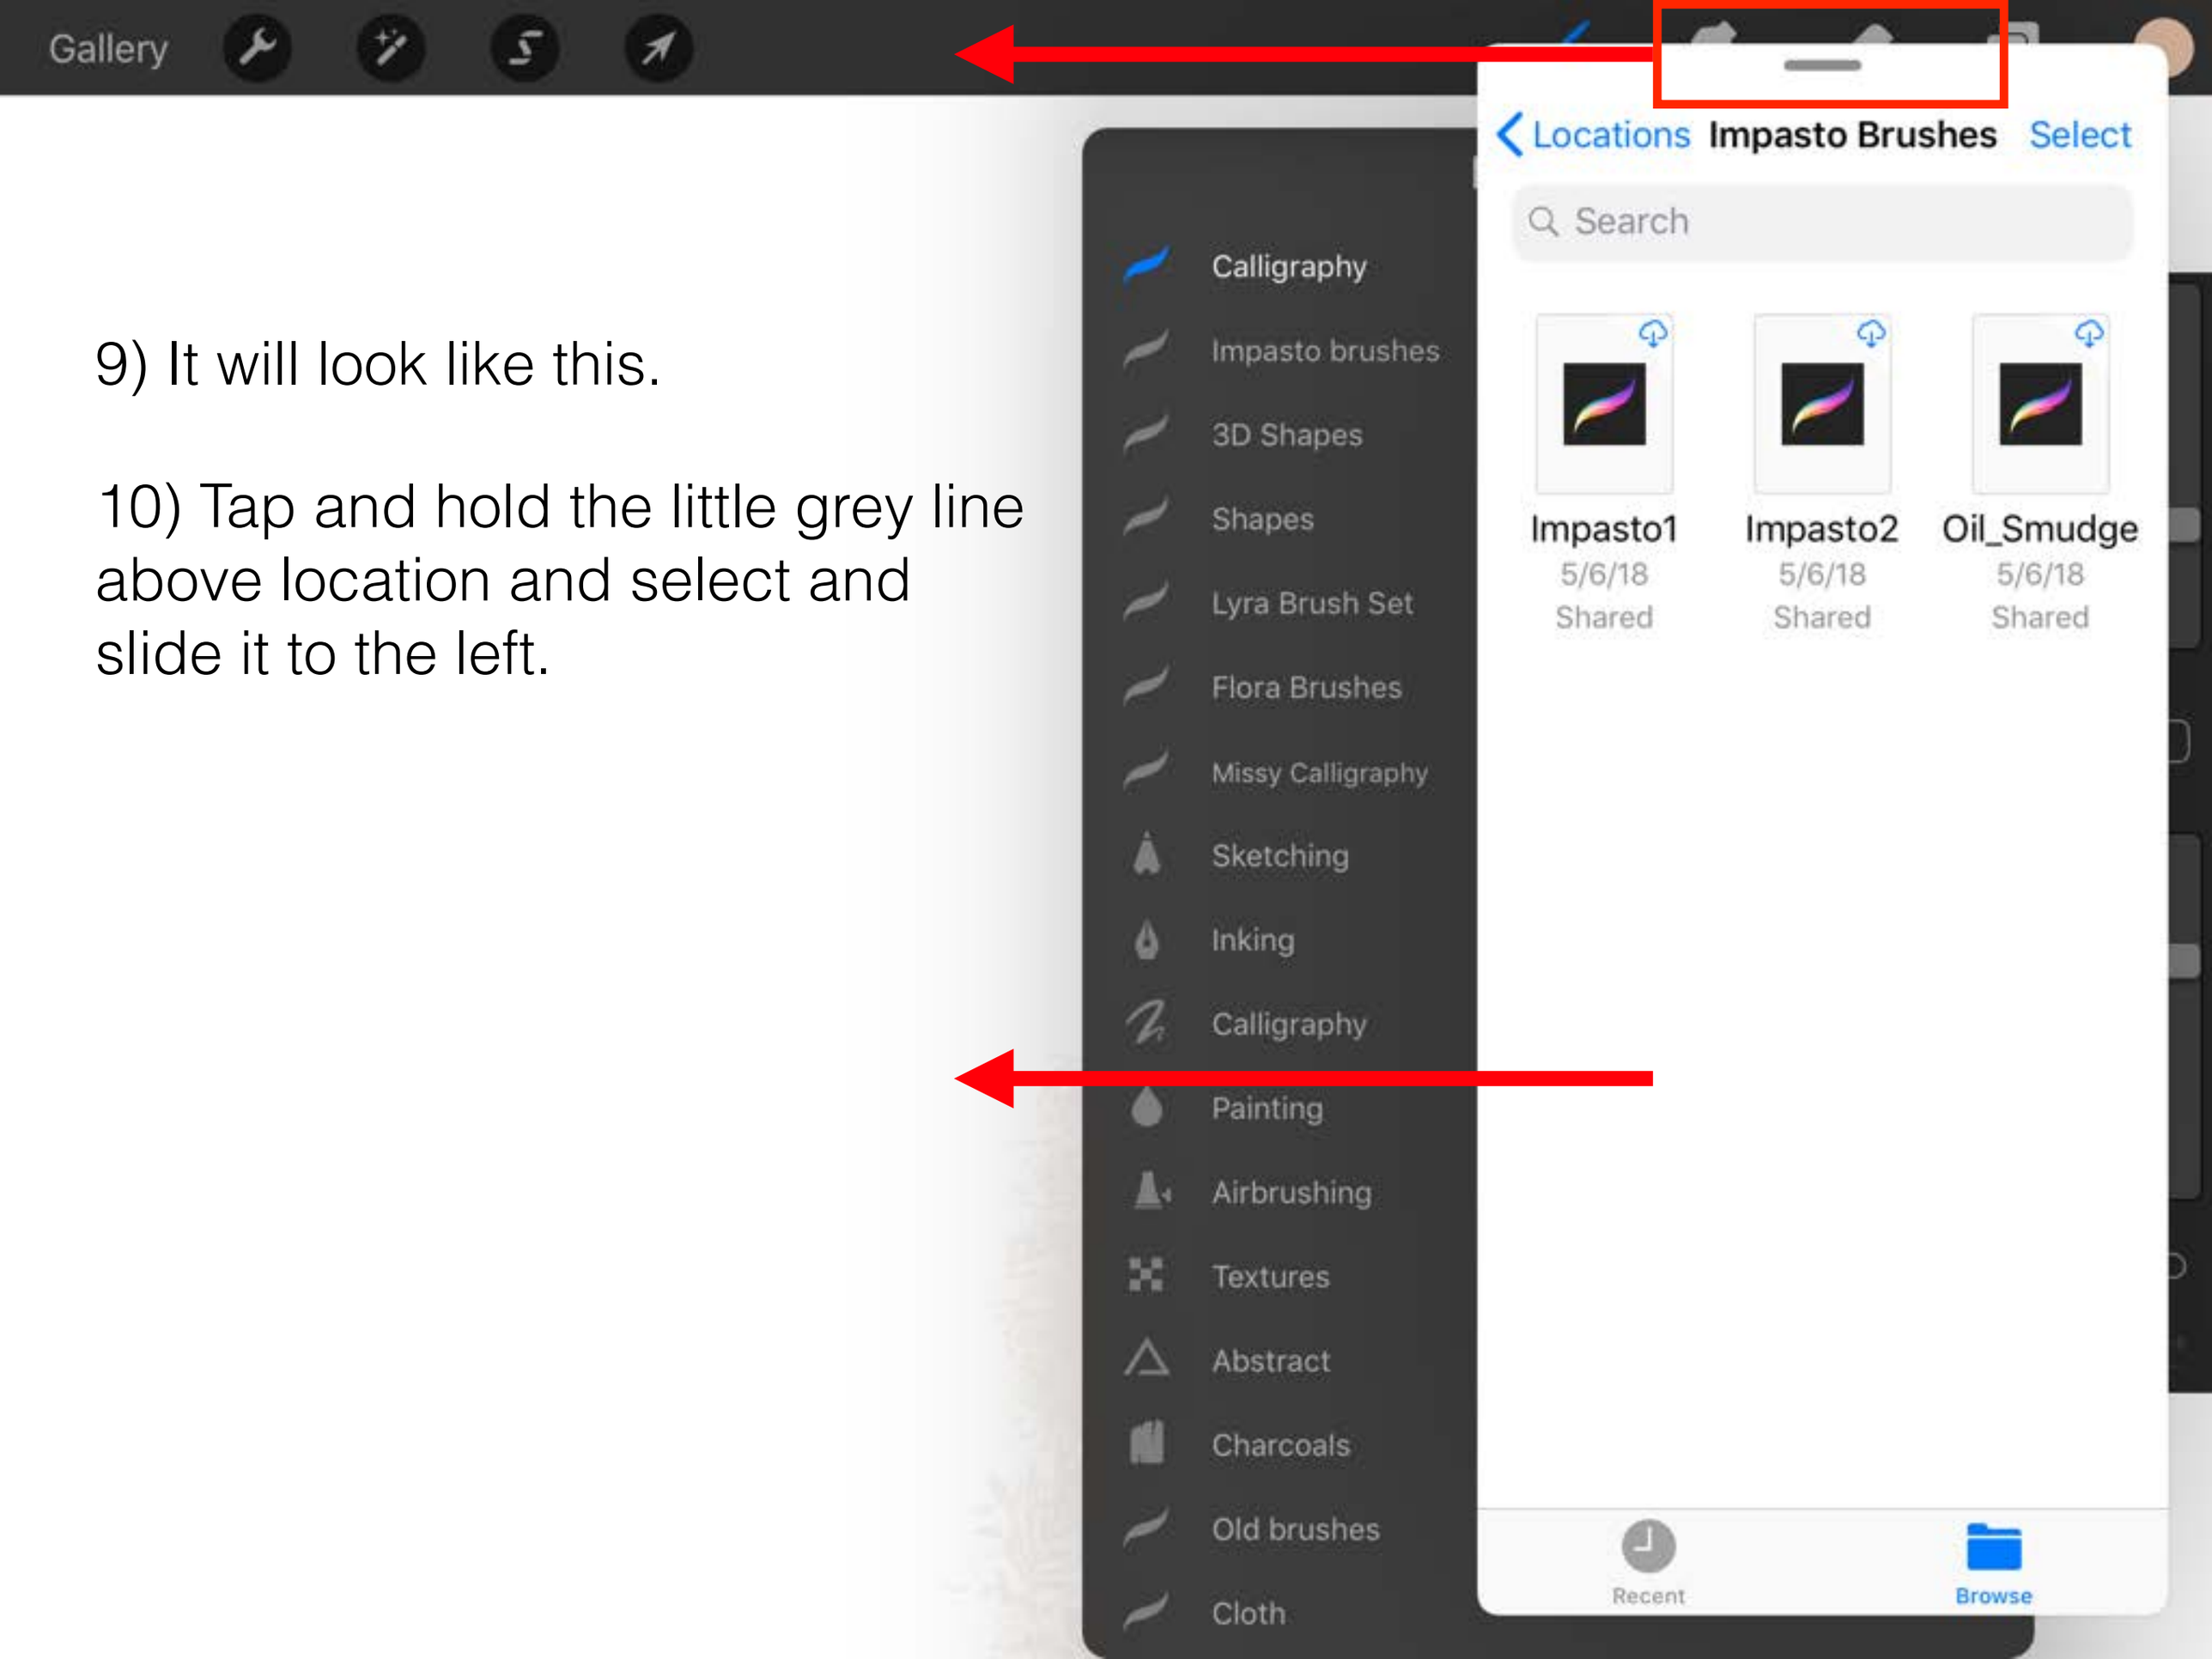


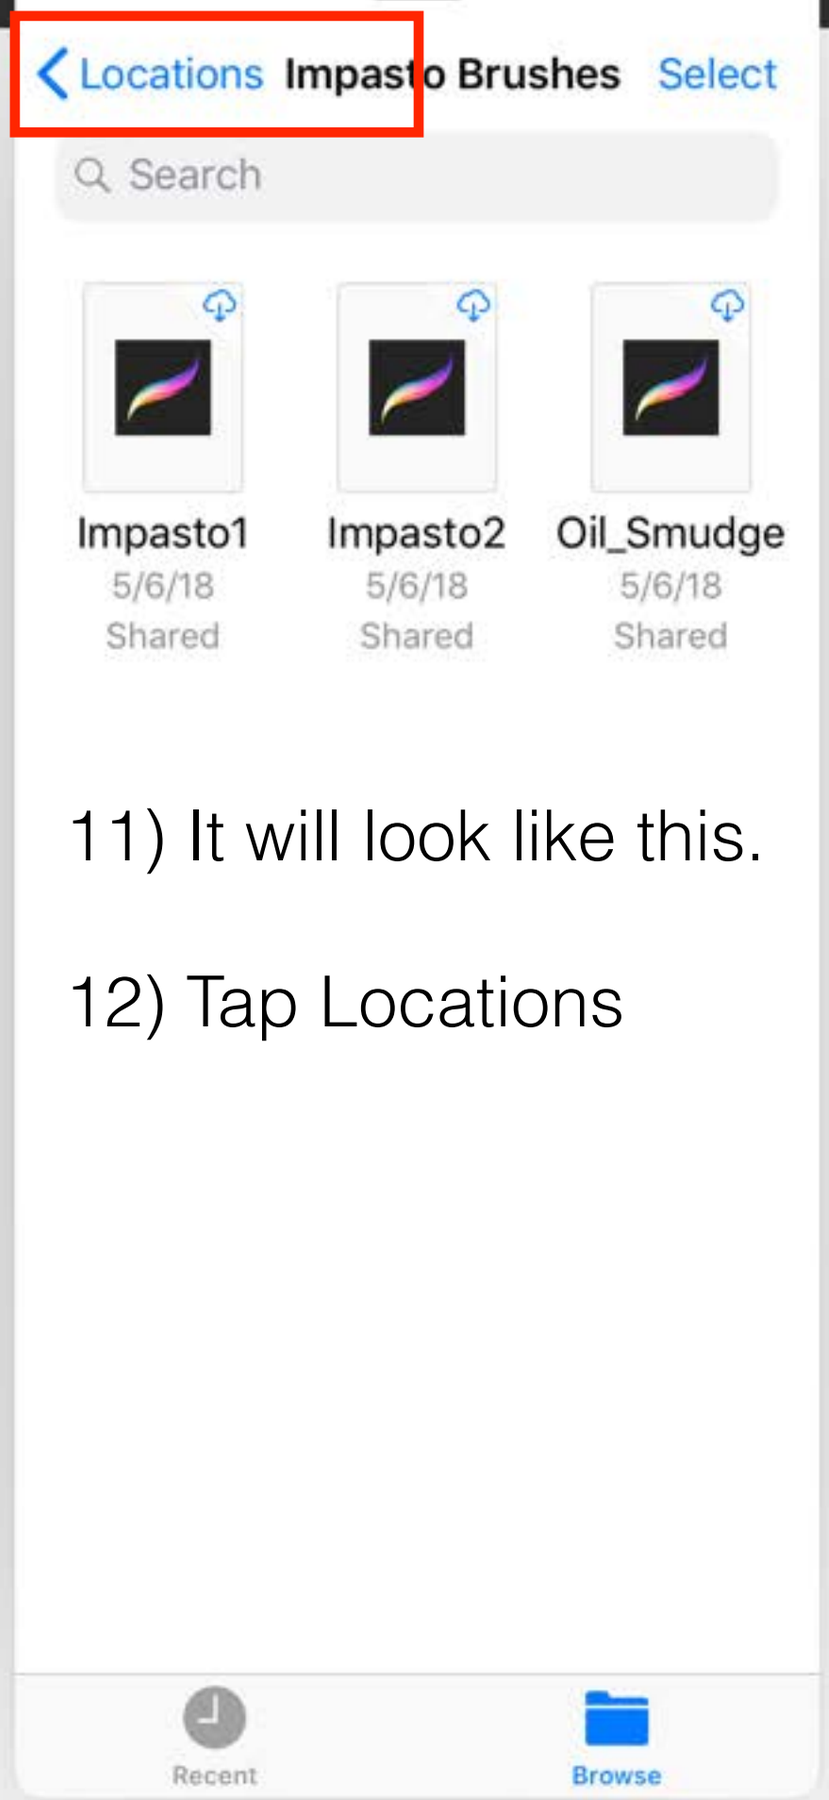
9) Release your finger



9) It will look like this.

10) Tap and hold the little grey line above location and select and slide it to the left.





11) It will look like this.

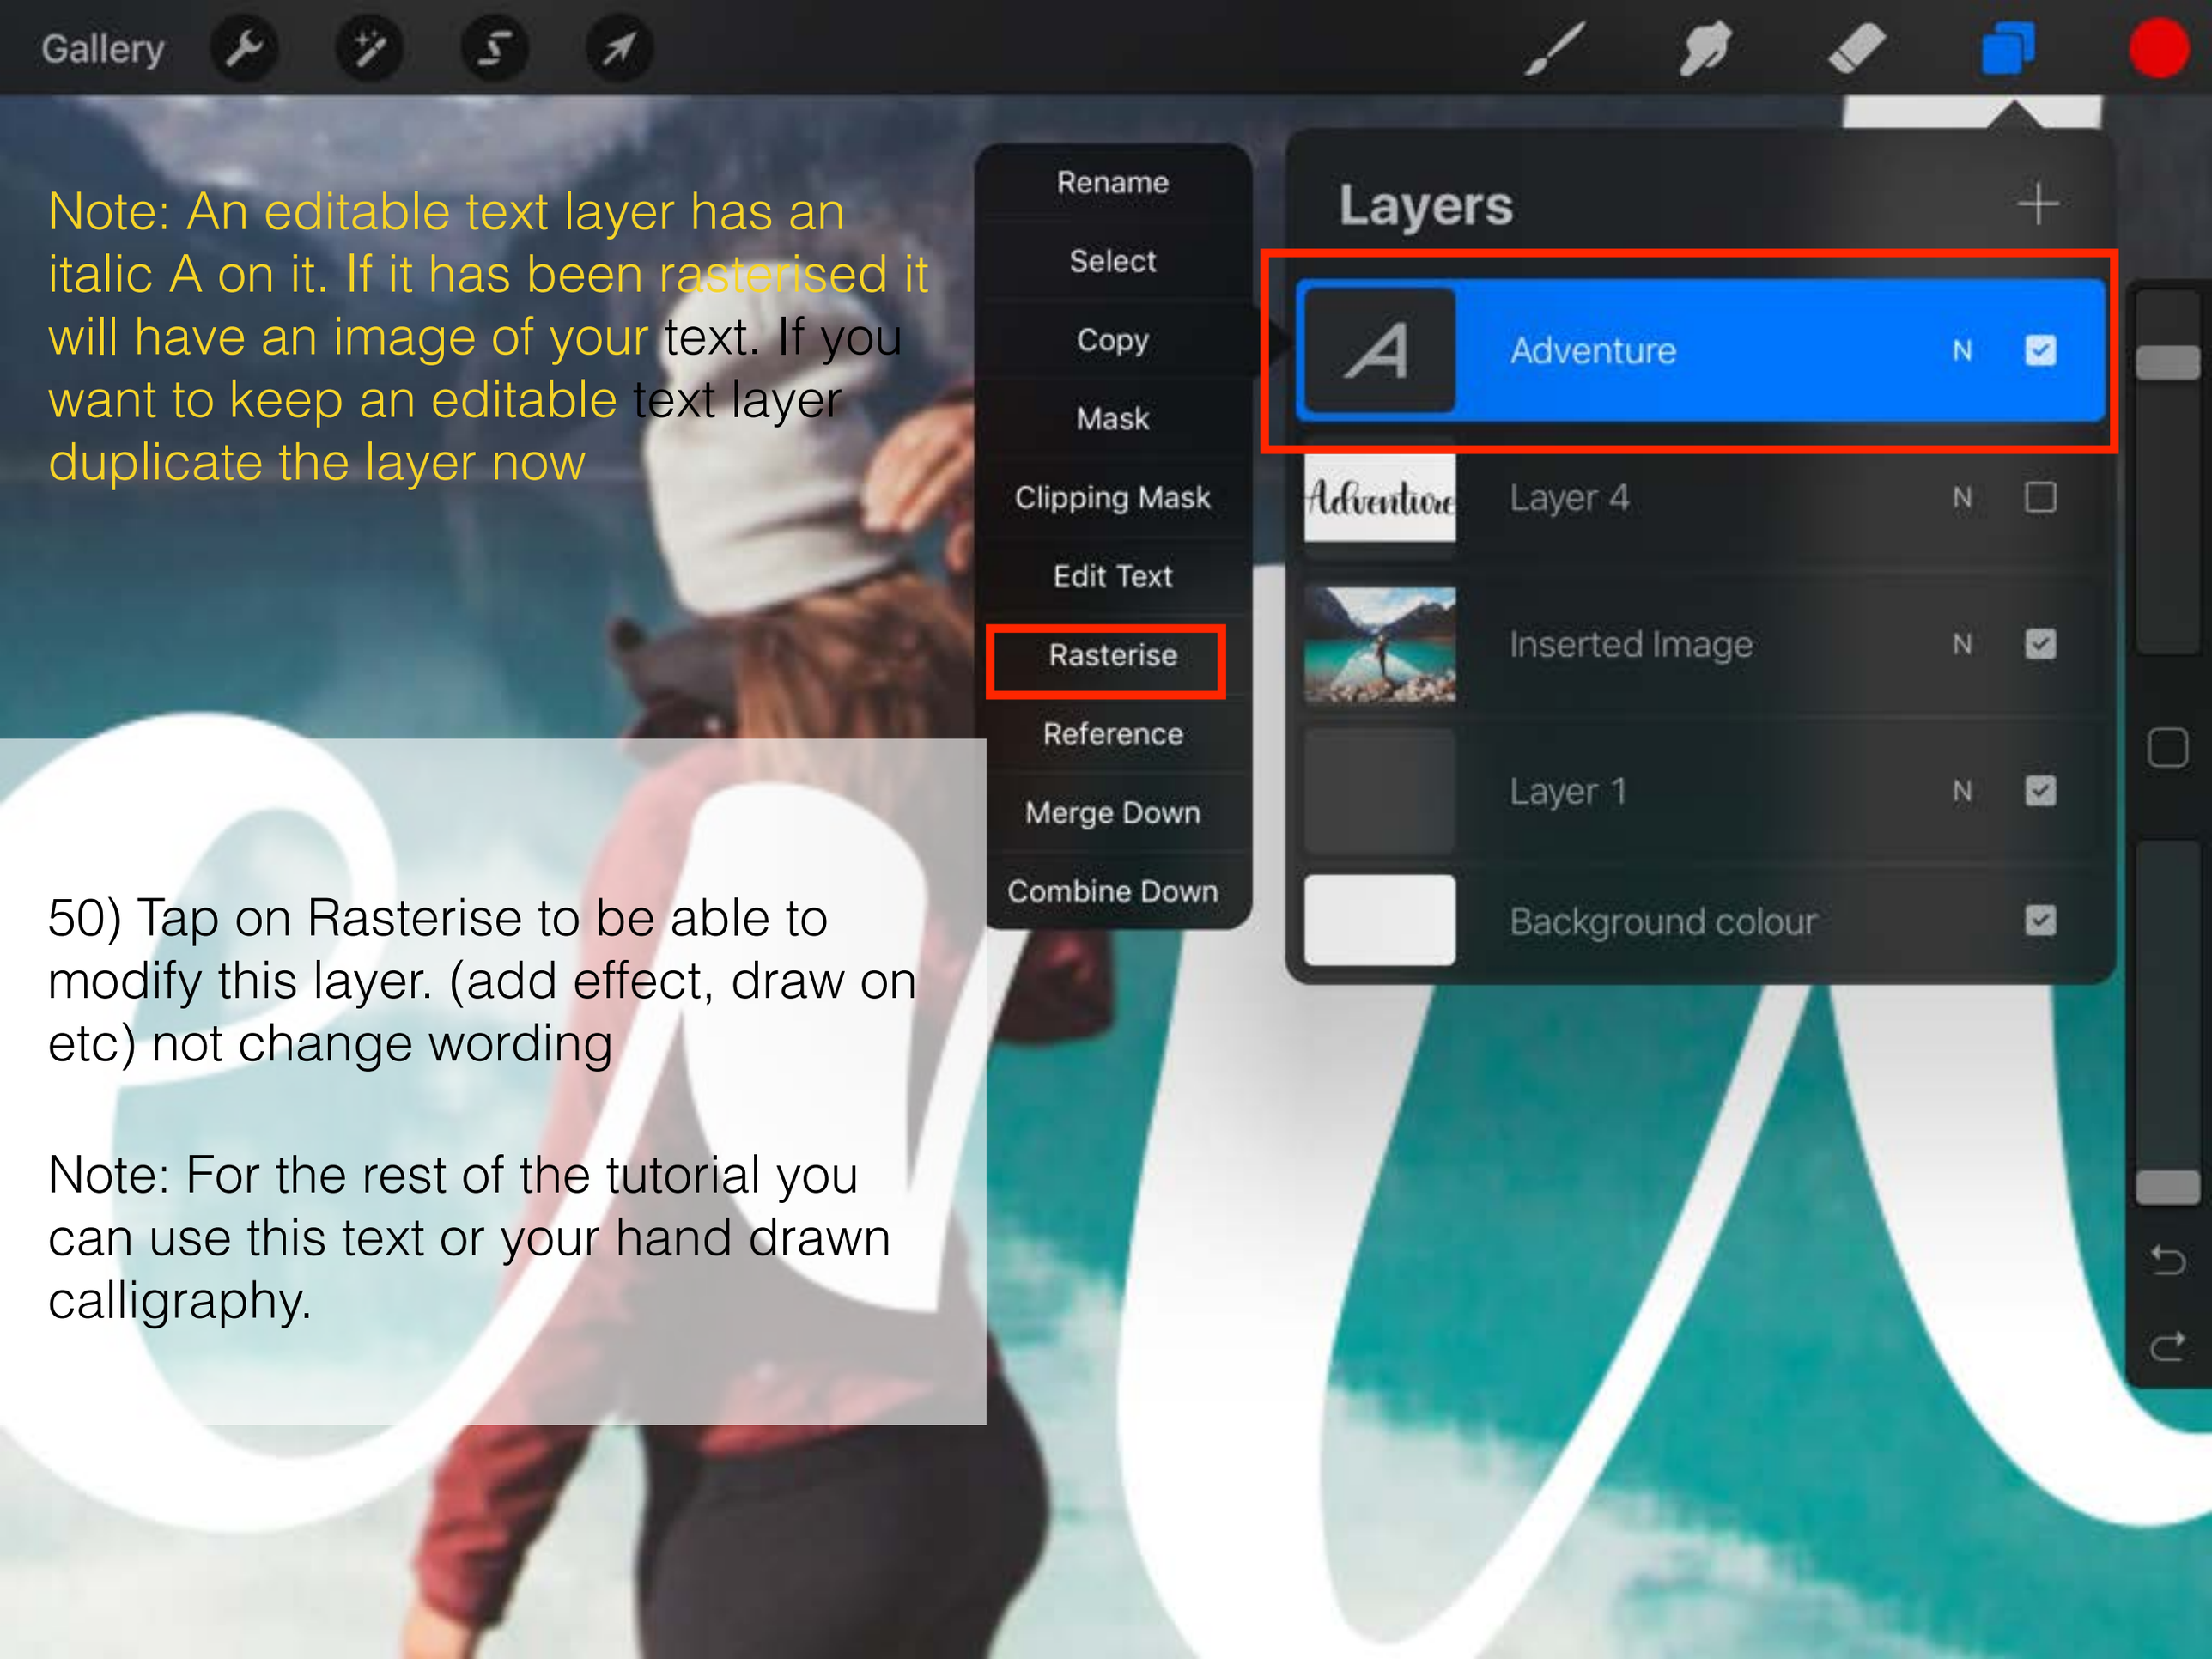
49) In the edit text mode select colour from colour tool and select white

Note: An editable text layer has an italic A on it. If it has been rasterised it will have an image of your text. If you want to keep an editable text layer duplicate the layer now

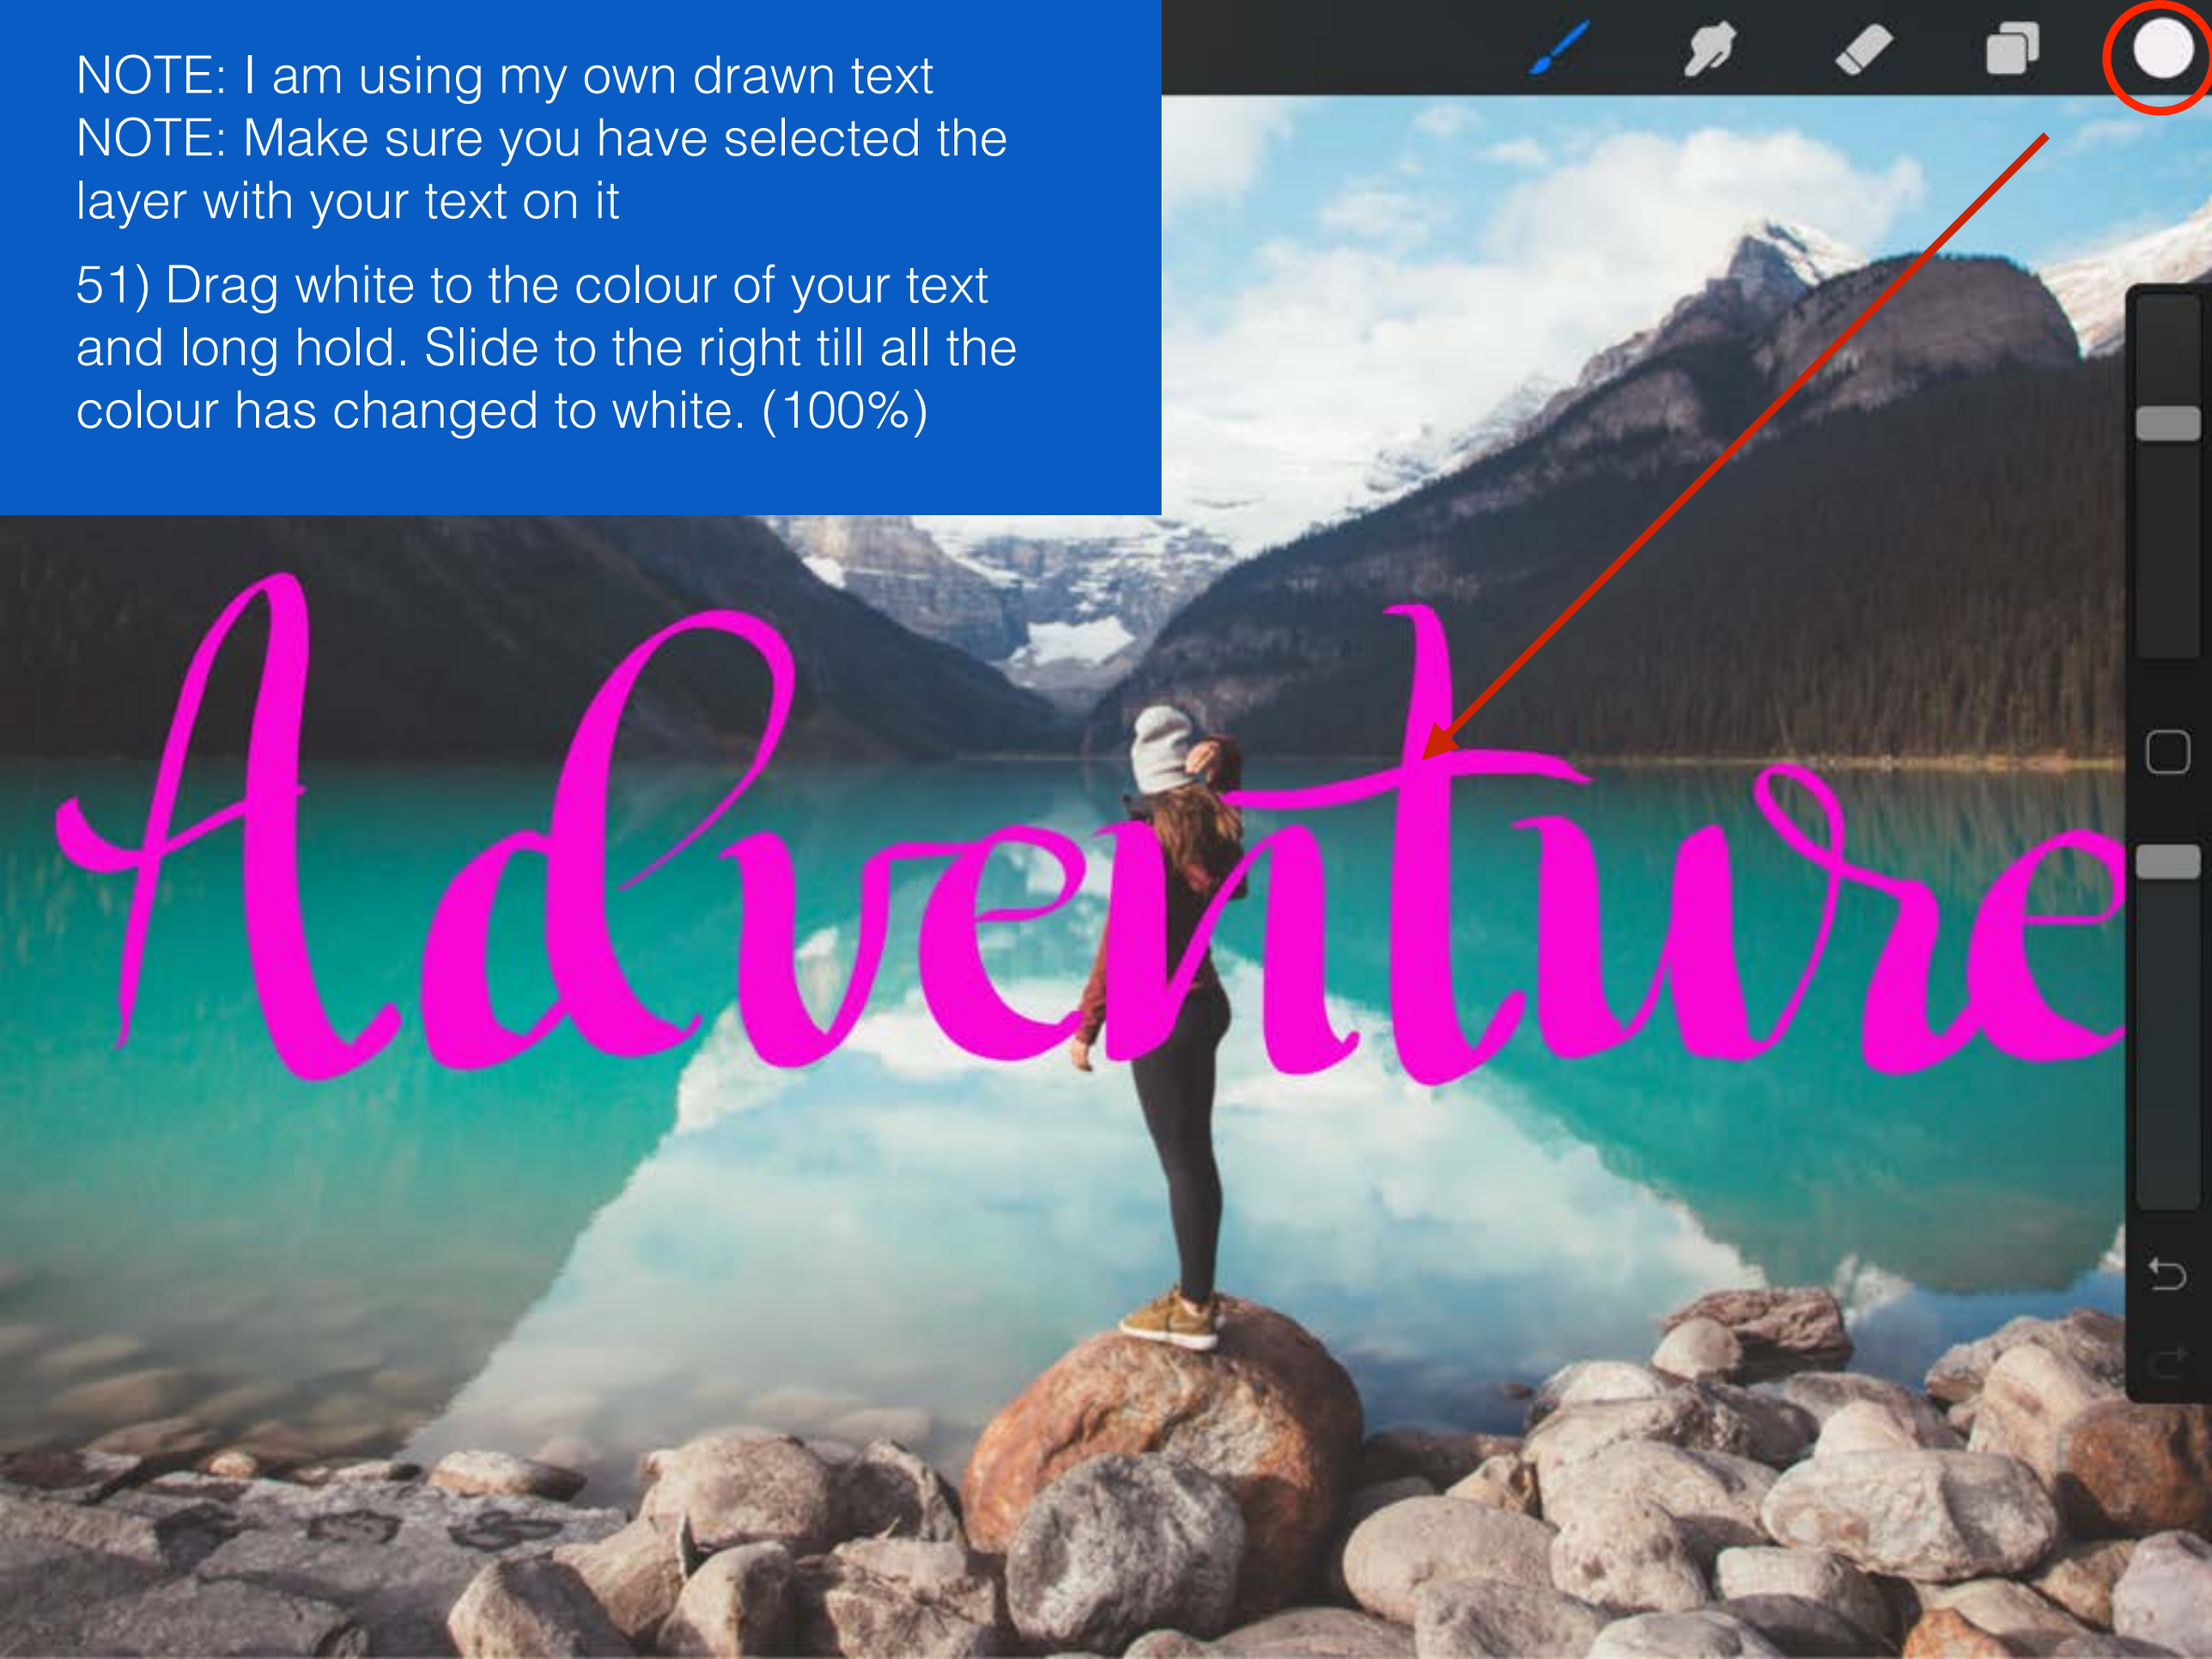
50) Tap on Rasterise to be able to modify this layer. (add effect, draw on etc) not change wording

Note: For the rest of the tutorial you can use this text or your hand drawn calligraphy.



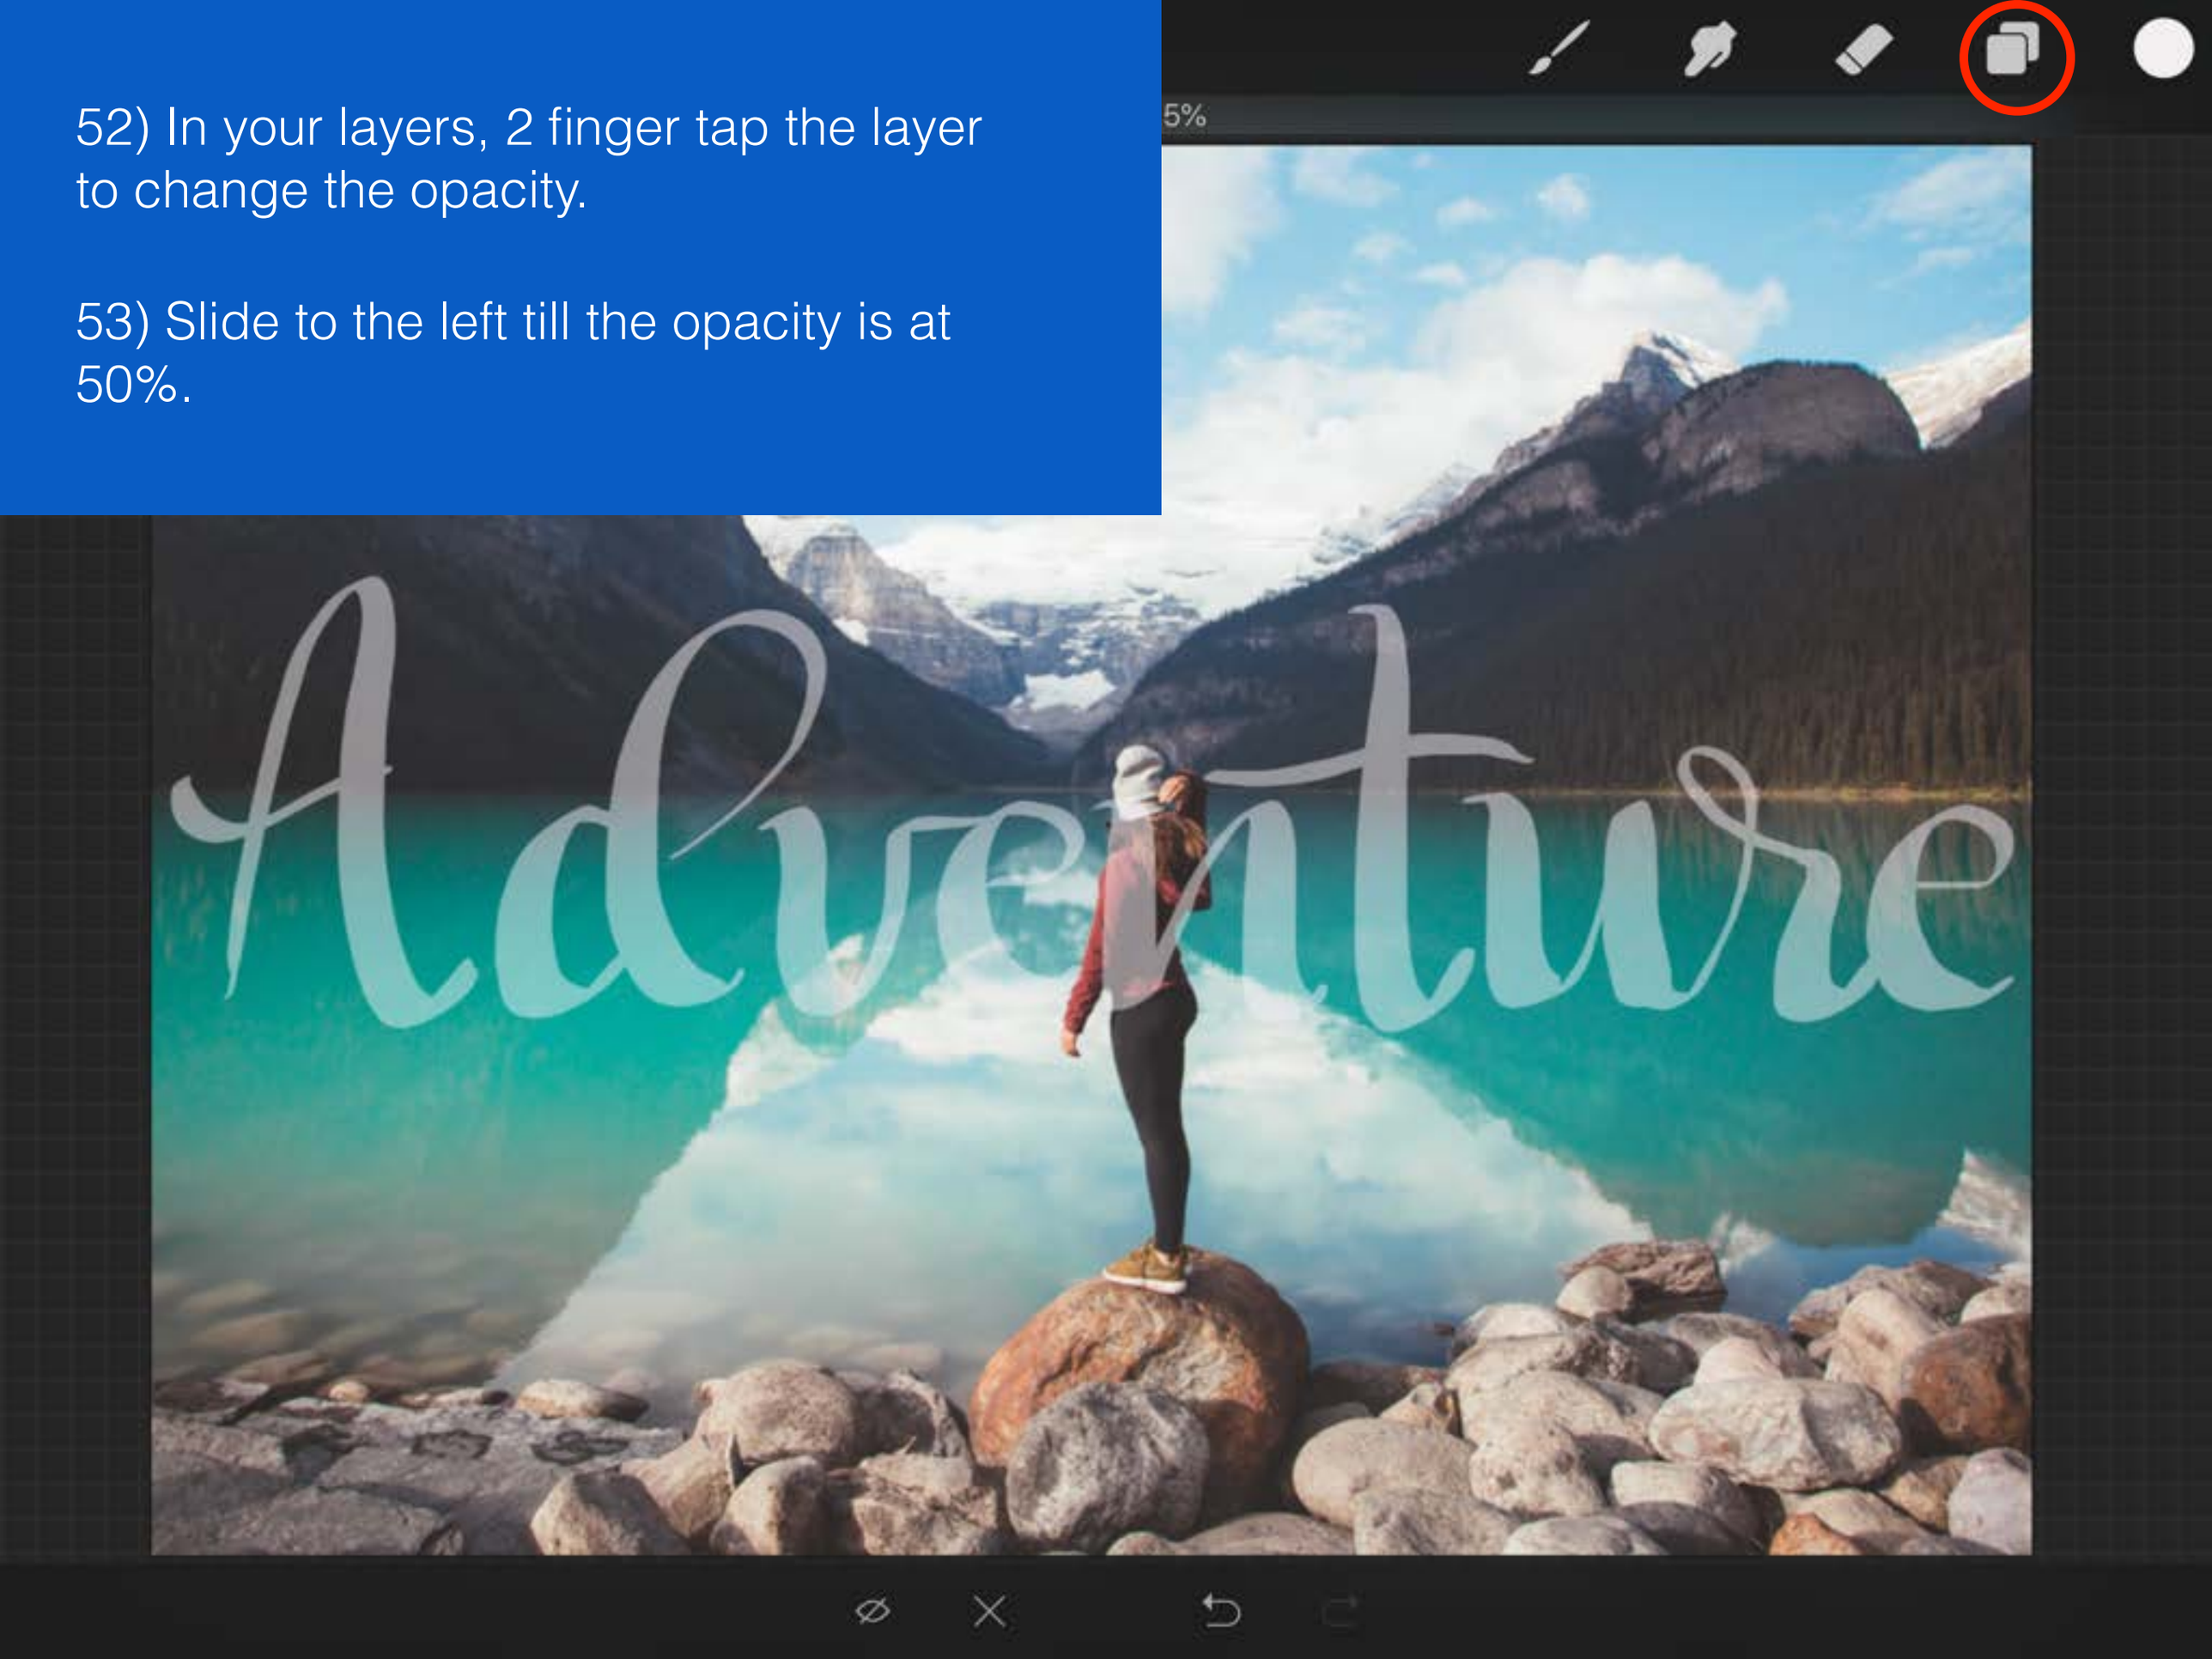
NOTE: I am using my own drawn text
NOTE: Make sure you have selected the layer with your text on it

51) Drag white to the colour of your text and long hold. Slide to the right till all the colour has changed to white. (100%)



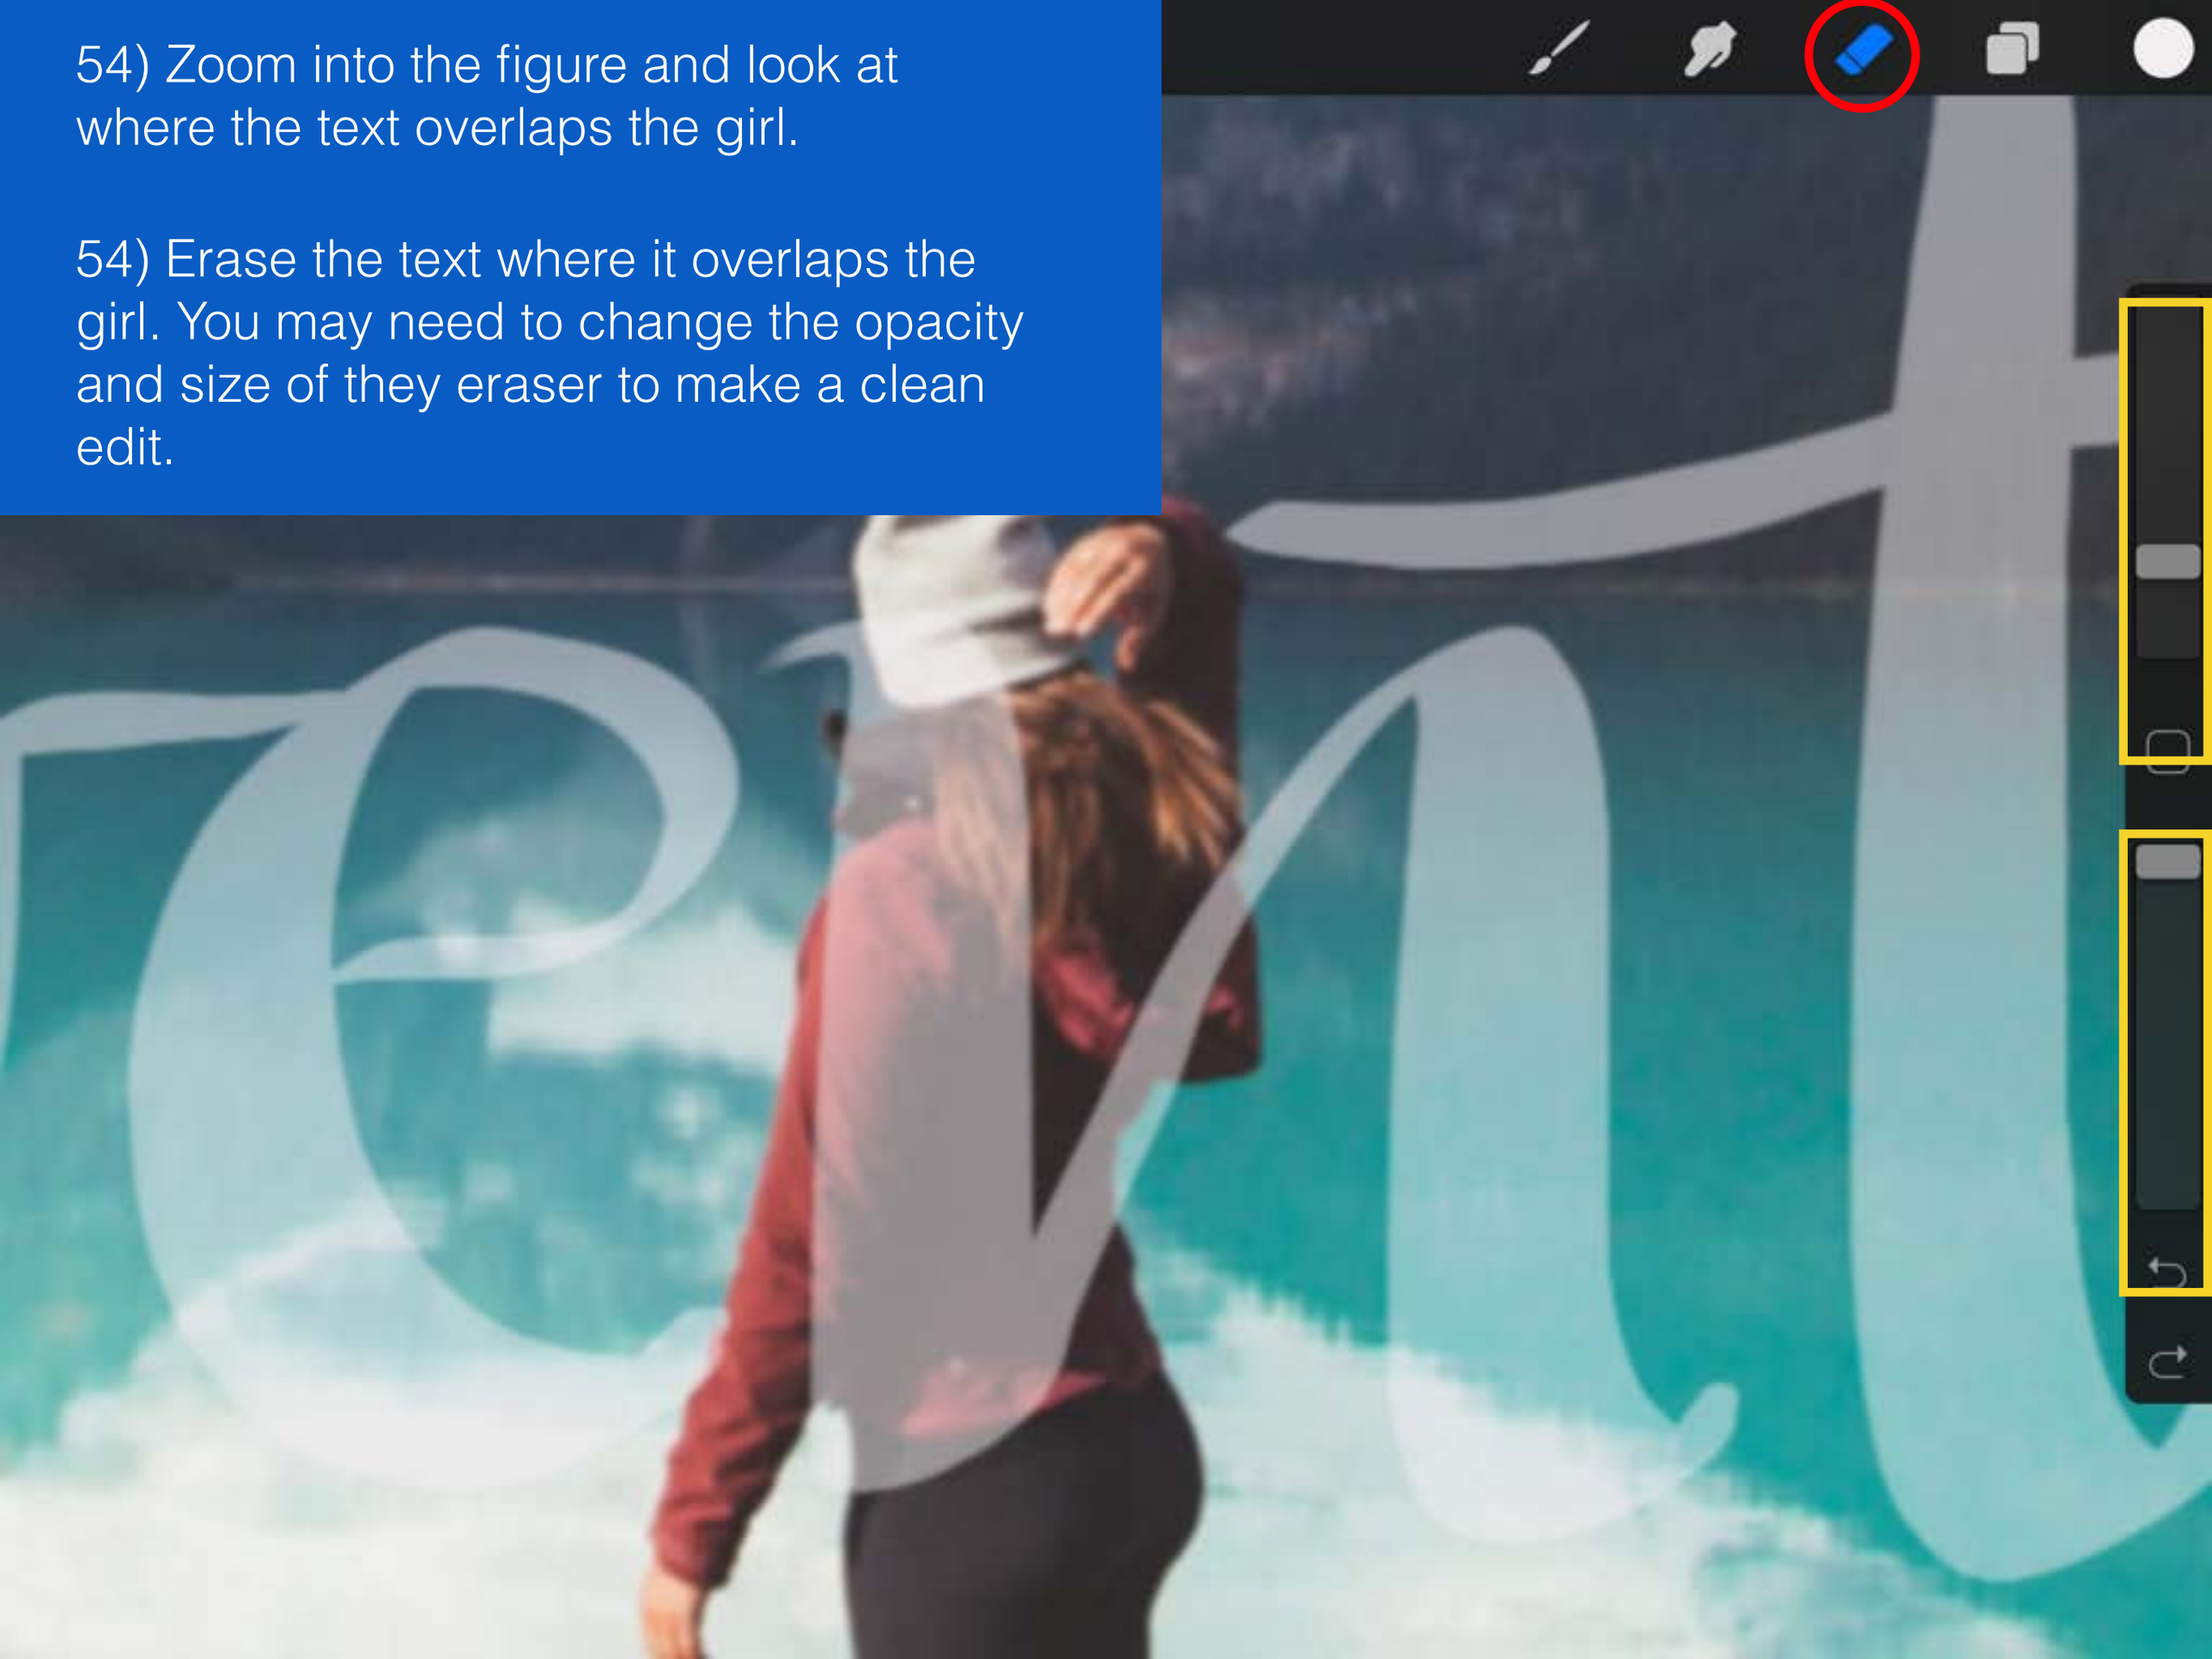
52) In your layers, 2 finger tap the layer to change the opacity.

53) Slide to the left till the opacity is at 50%.



54) Zoom into the figure and look at where the text overlaps the girl.

54) Erase the text where it overlaps the girl. You may need to change the opacity and size of they eraser to make a clean edit.

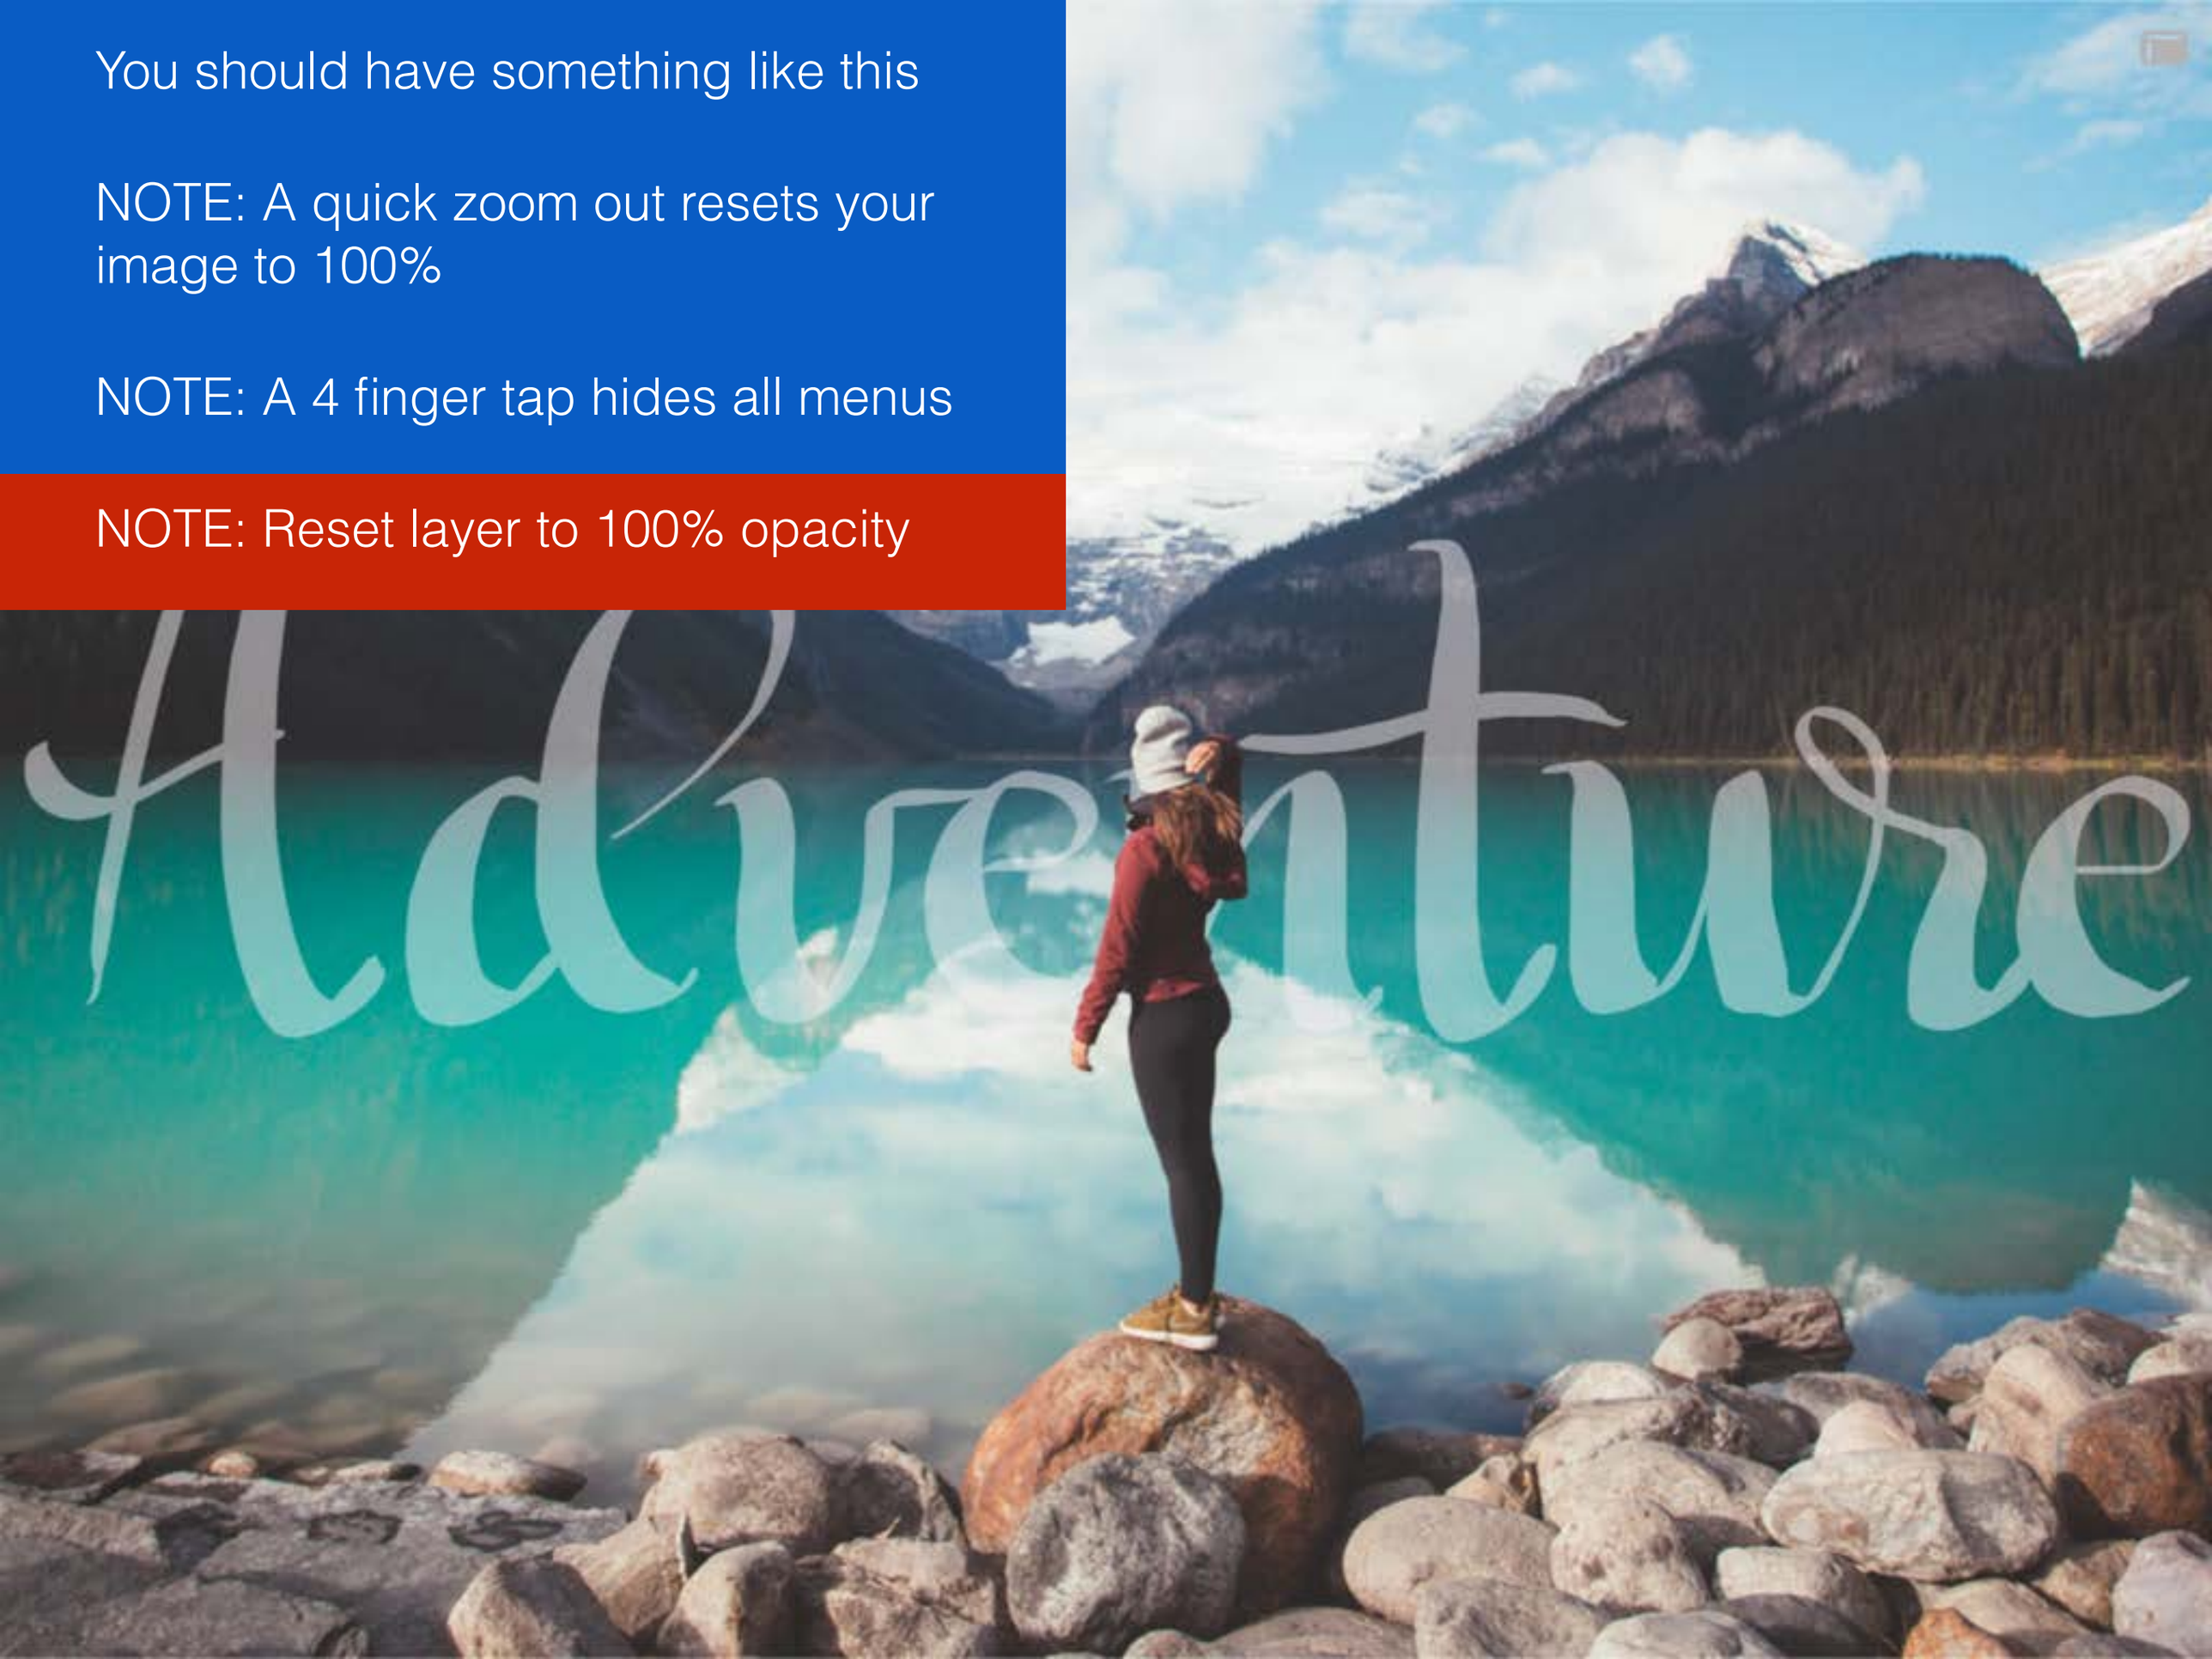


You should have something like this

NOTE: A quick zoom out resets your image to 100%

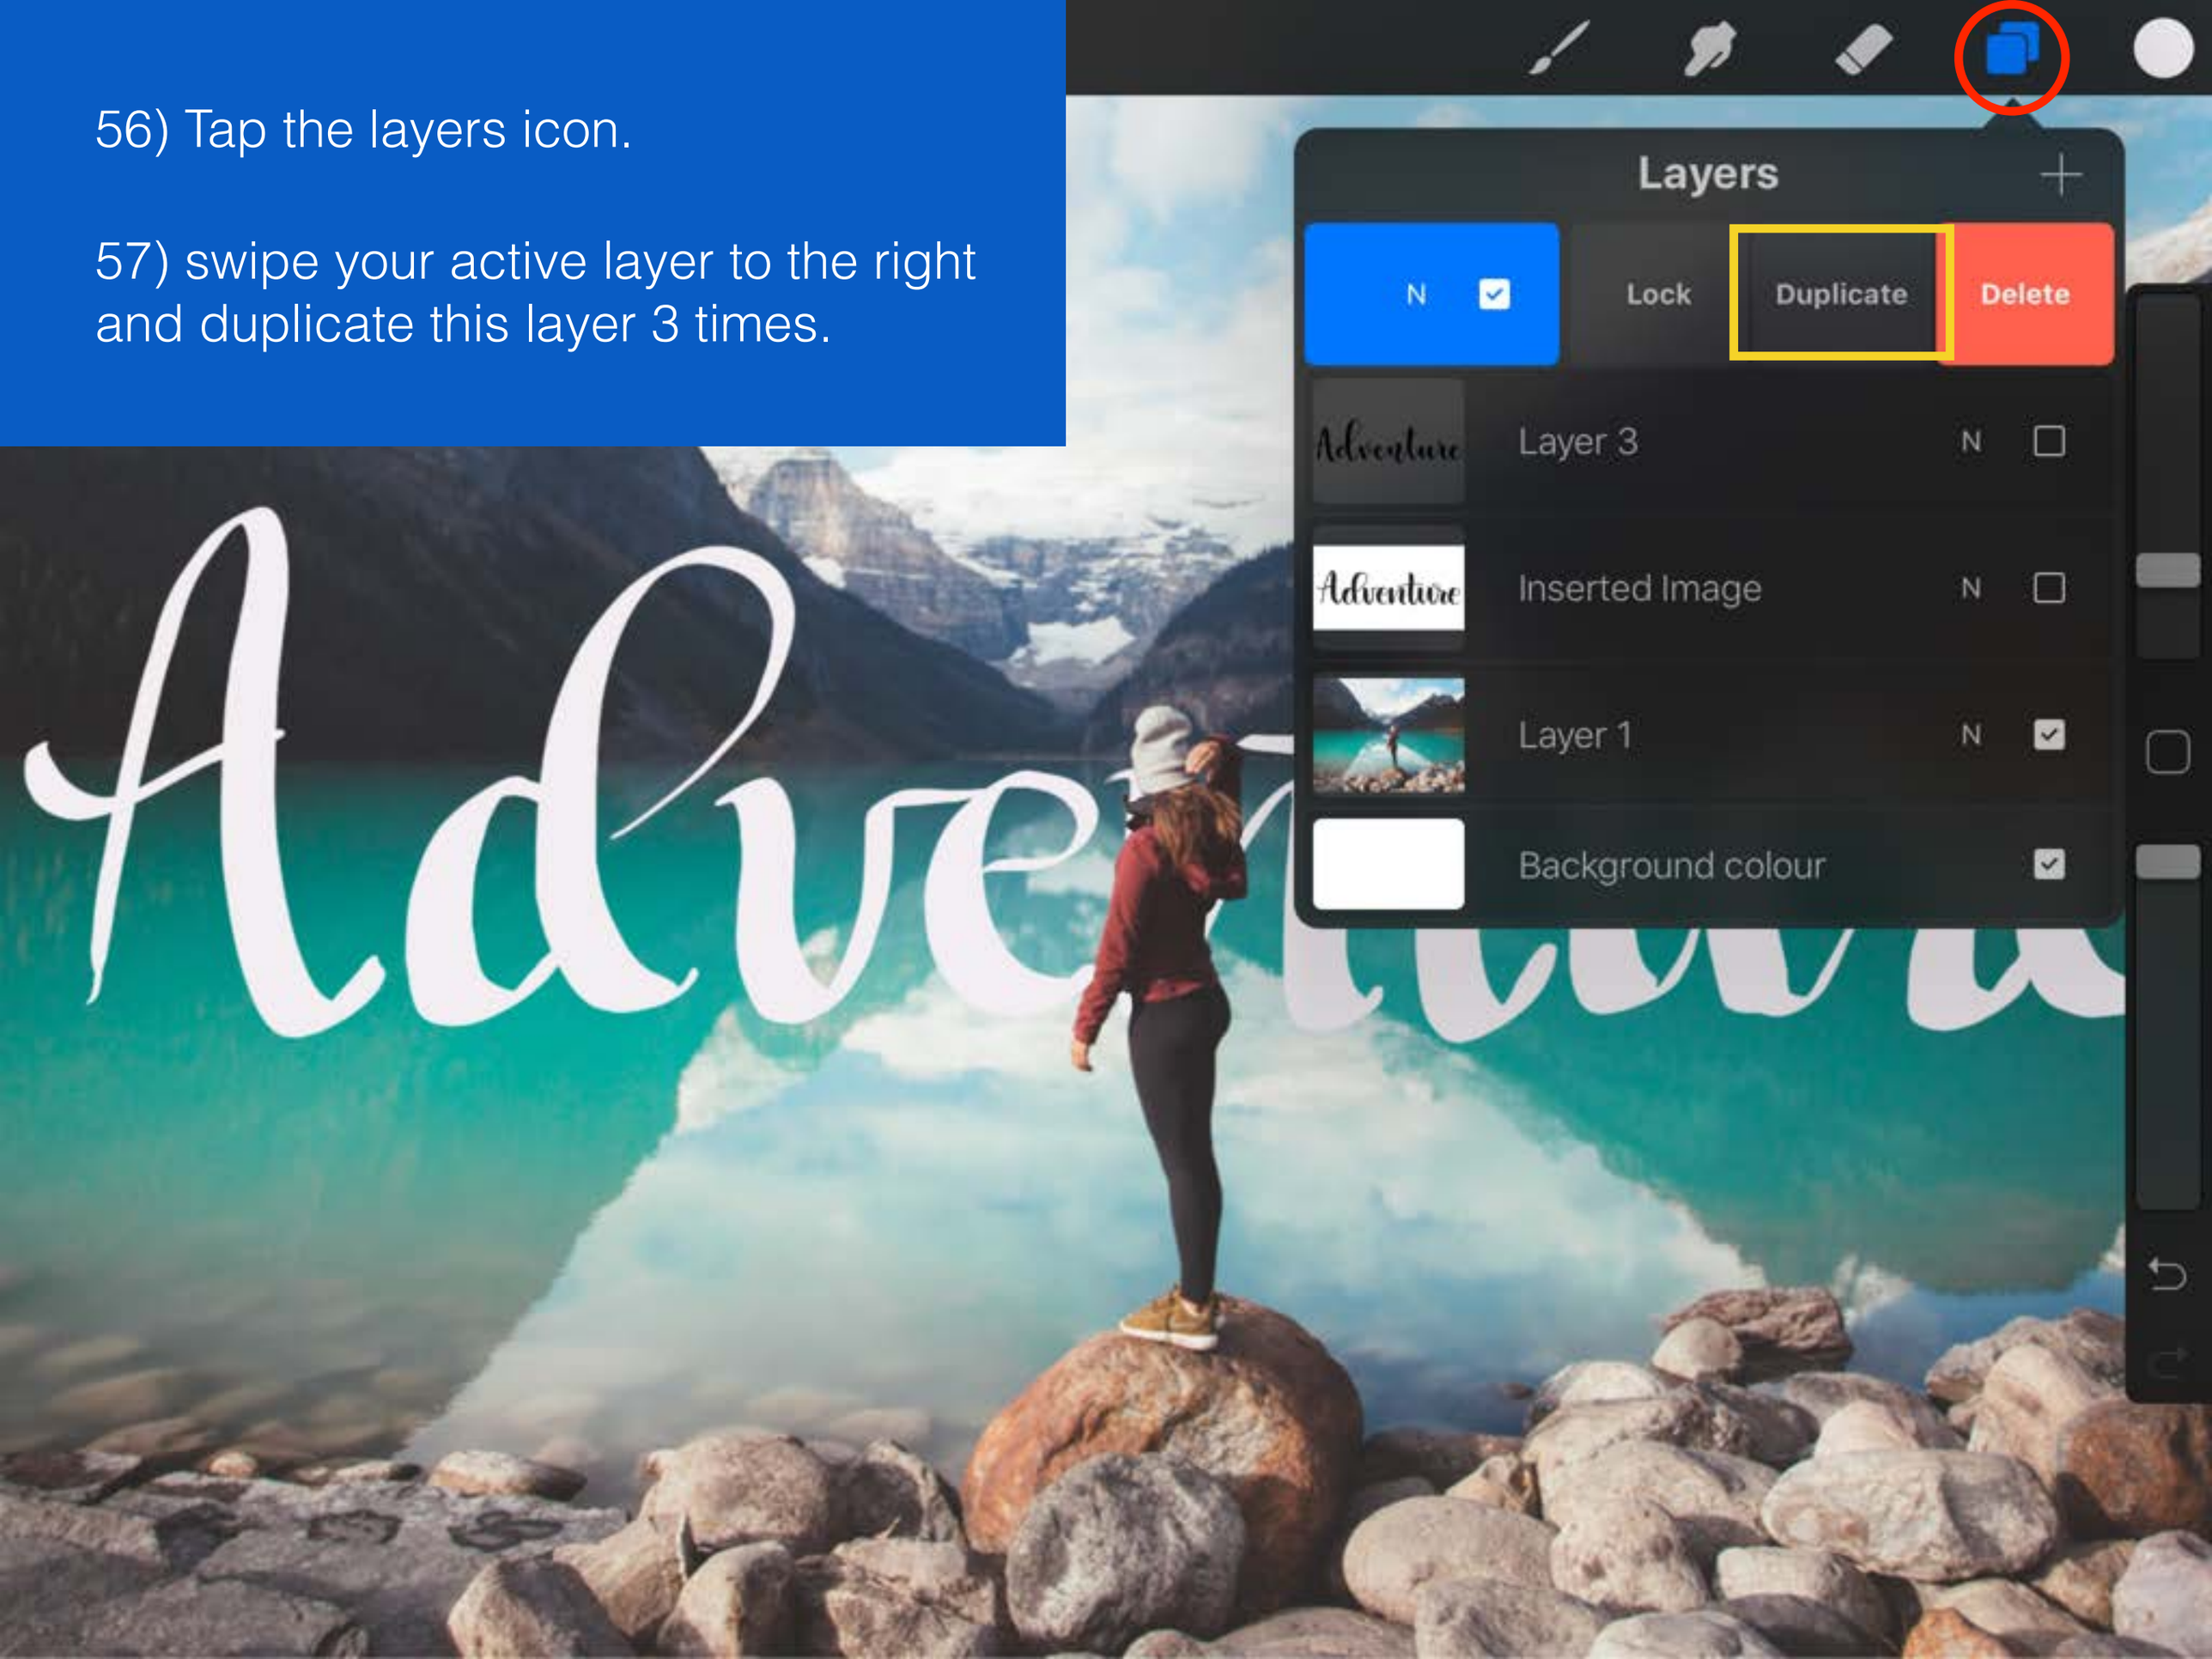
NOTE: A 4 finger tap hides all menus

NOTE: Reset layer to 100% opacity



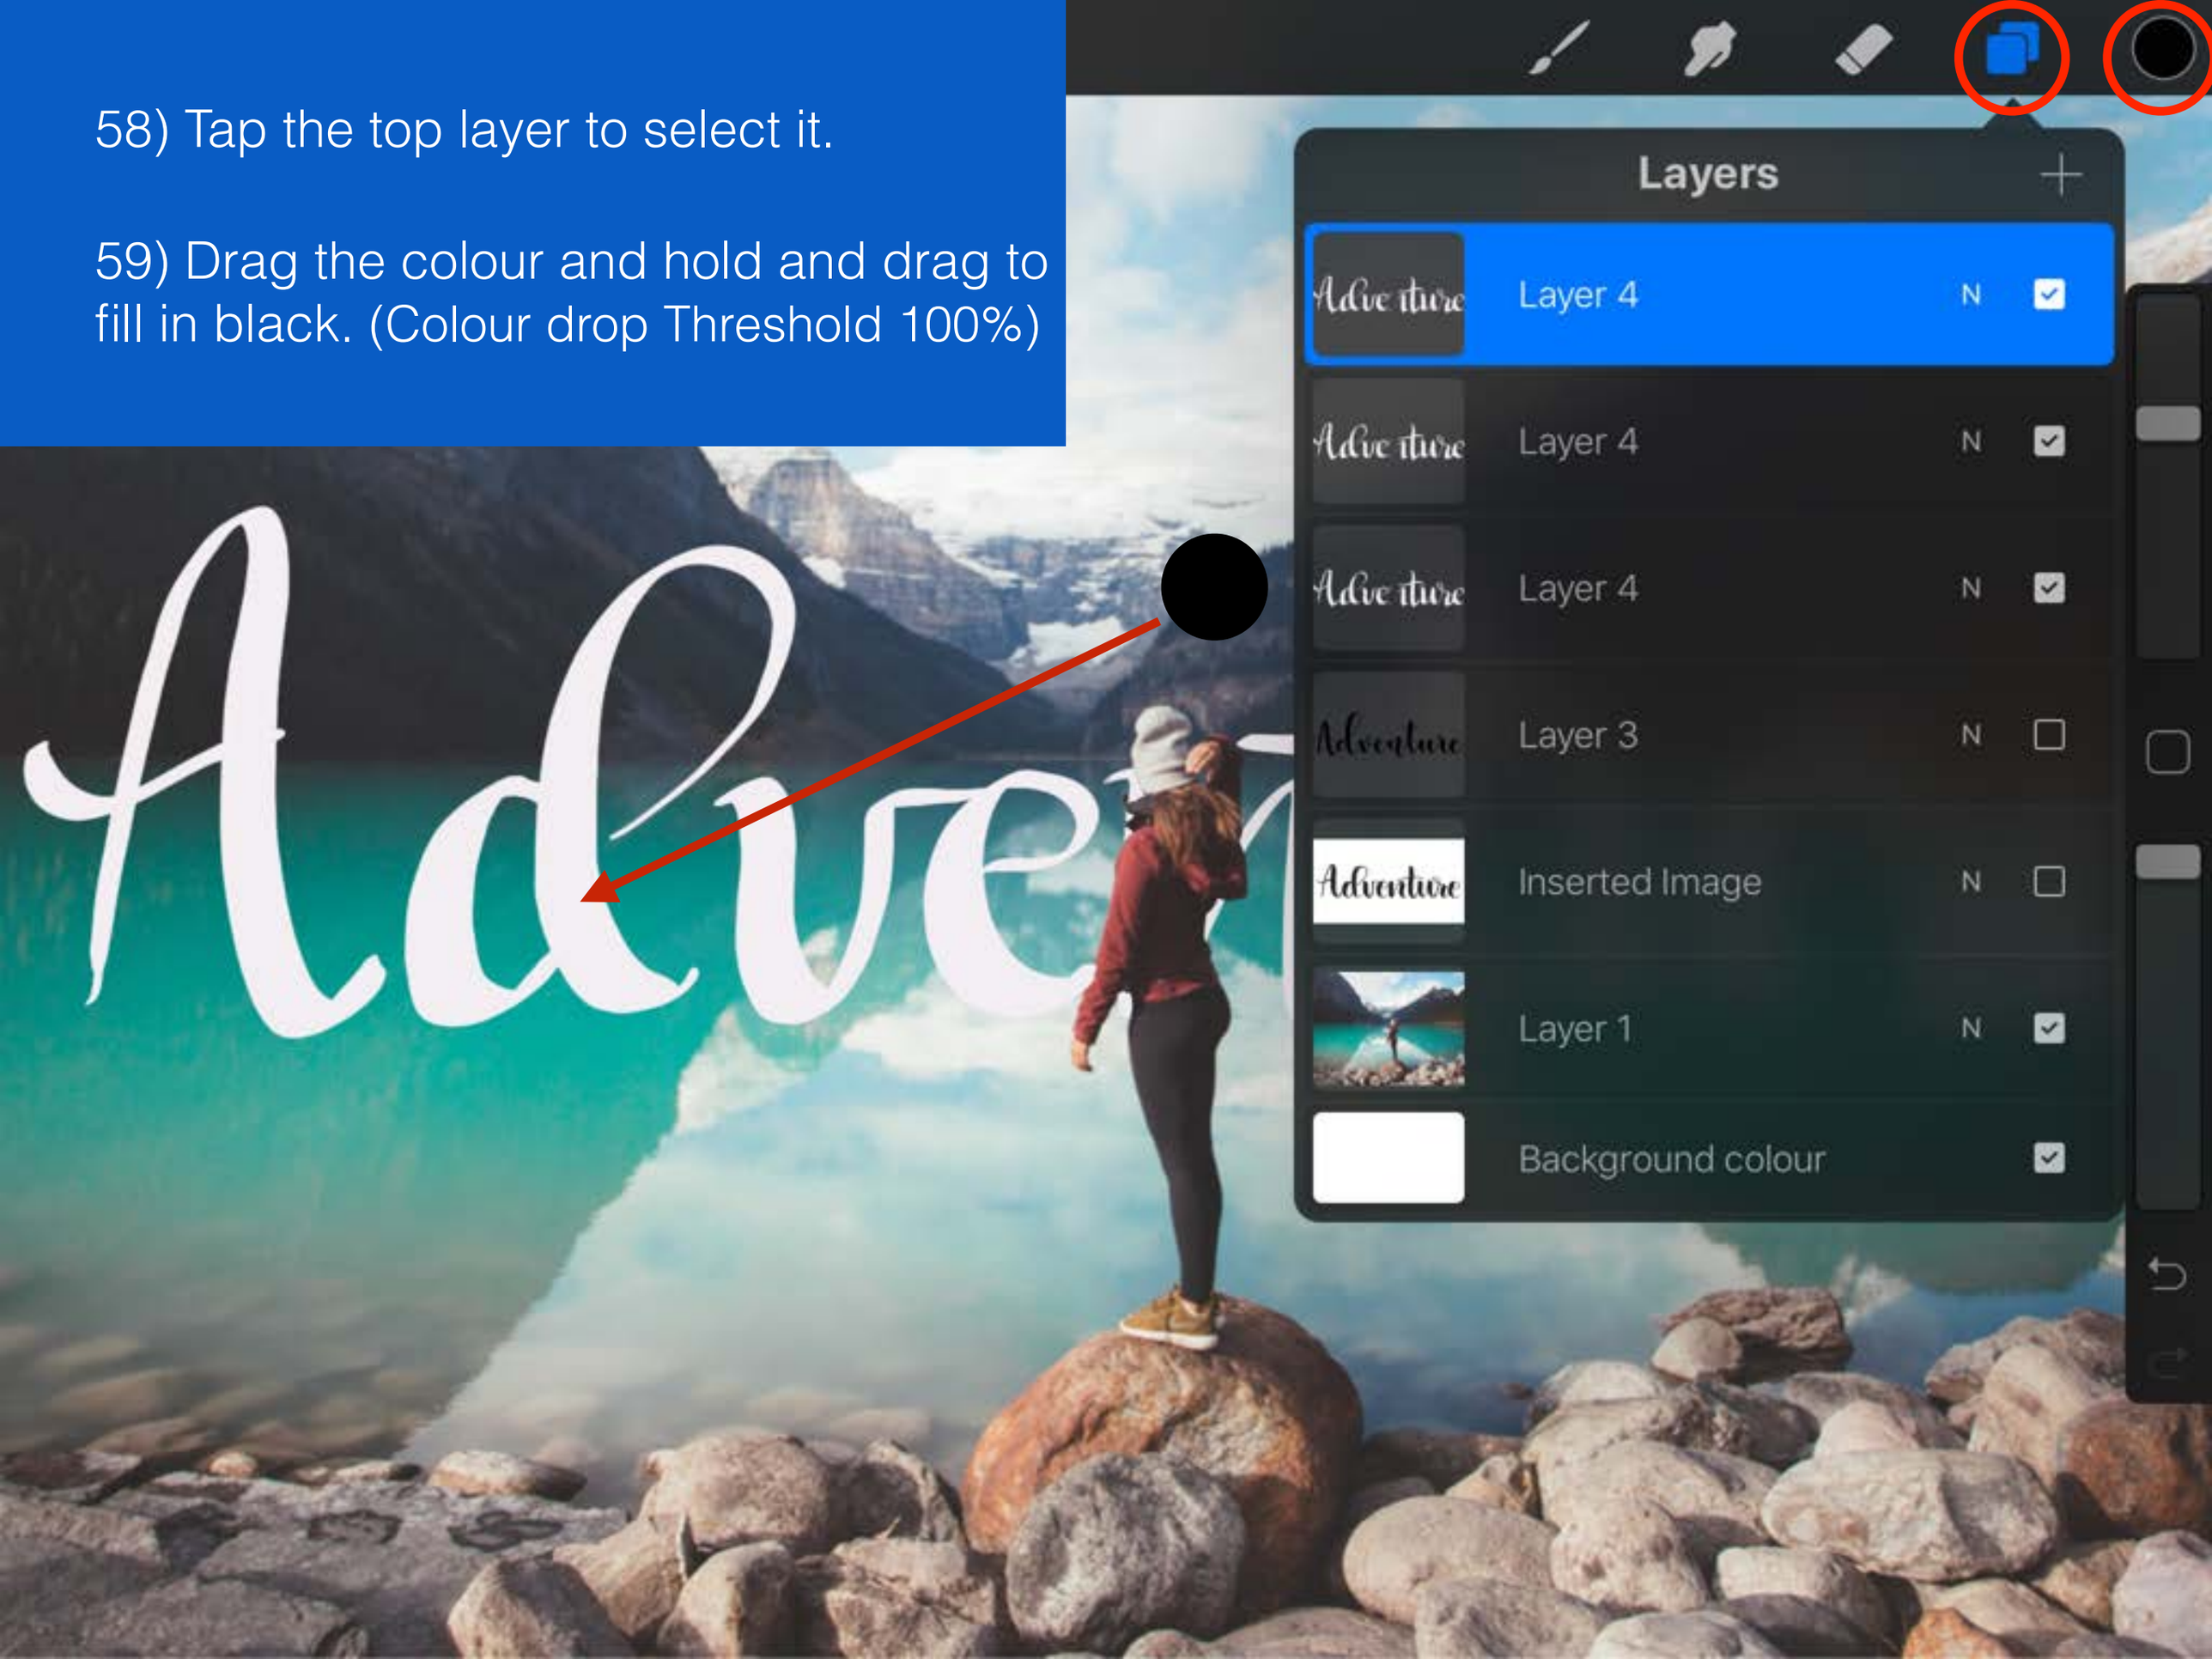
56) Tap the layers icon.

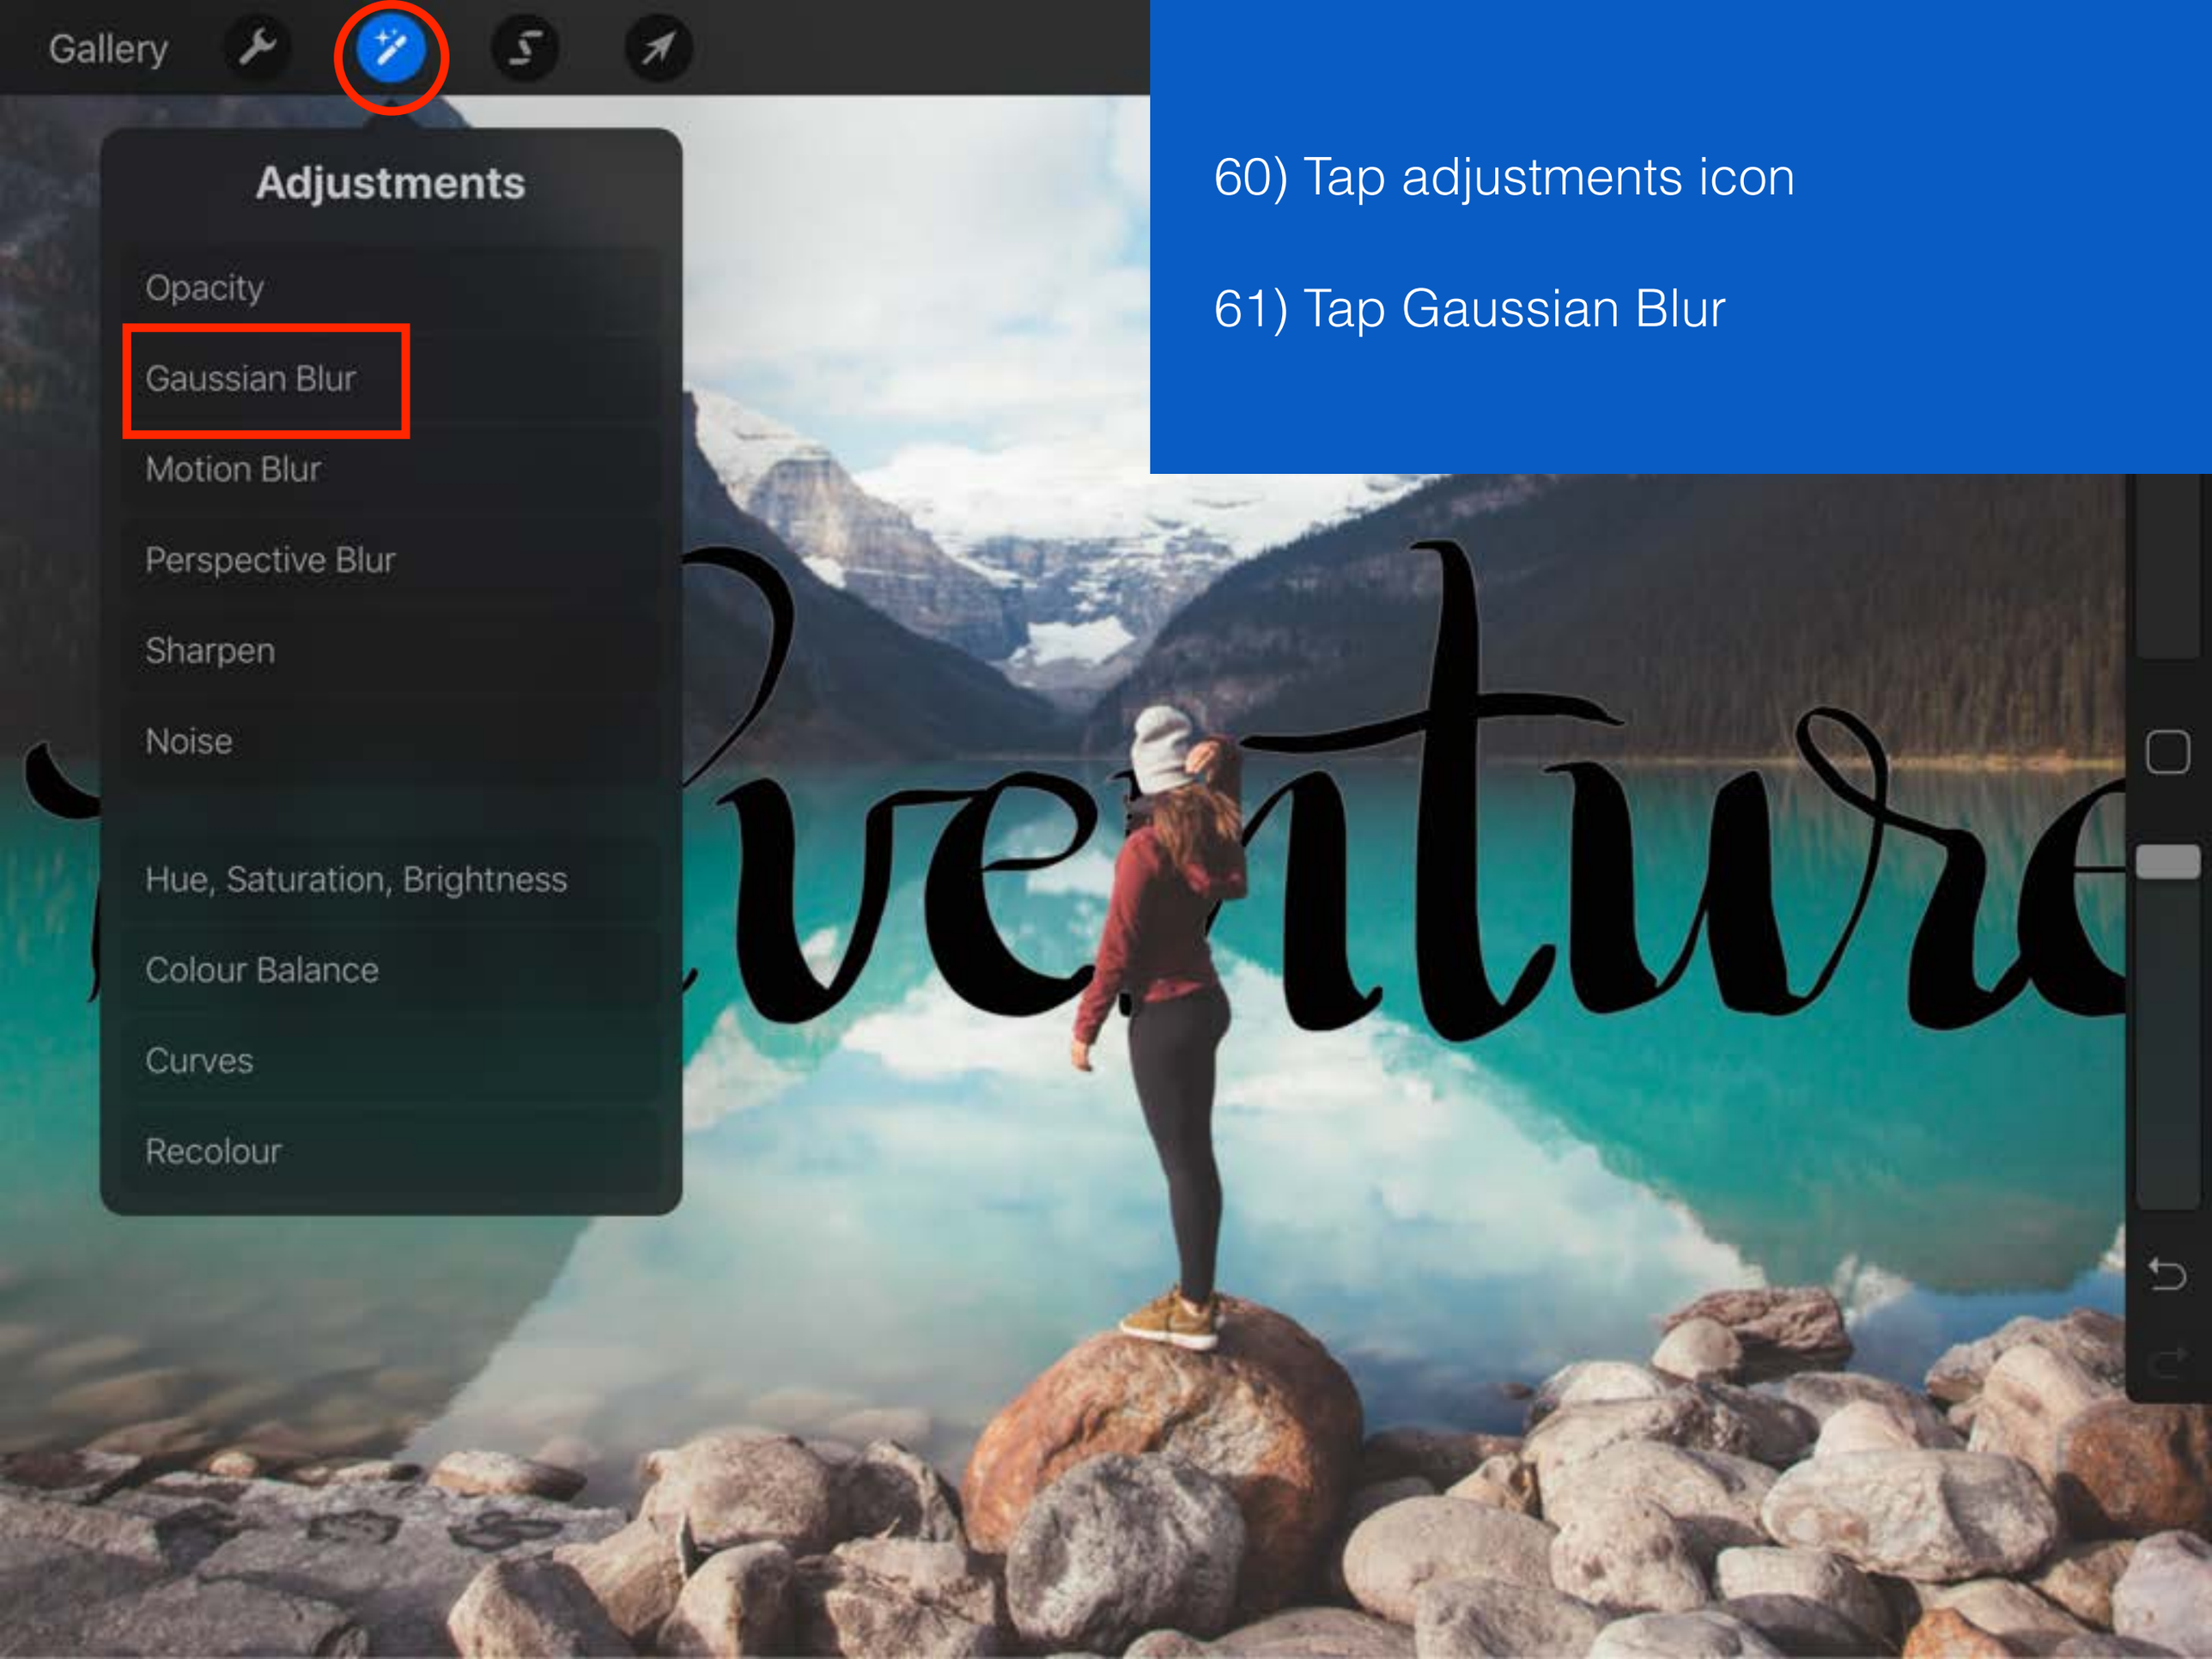
57) swipe your active layer to the right and duplicate this layer 3 times.



58) Tap the top layer to select it.

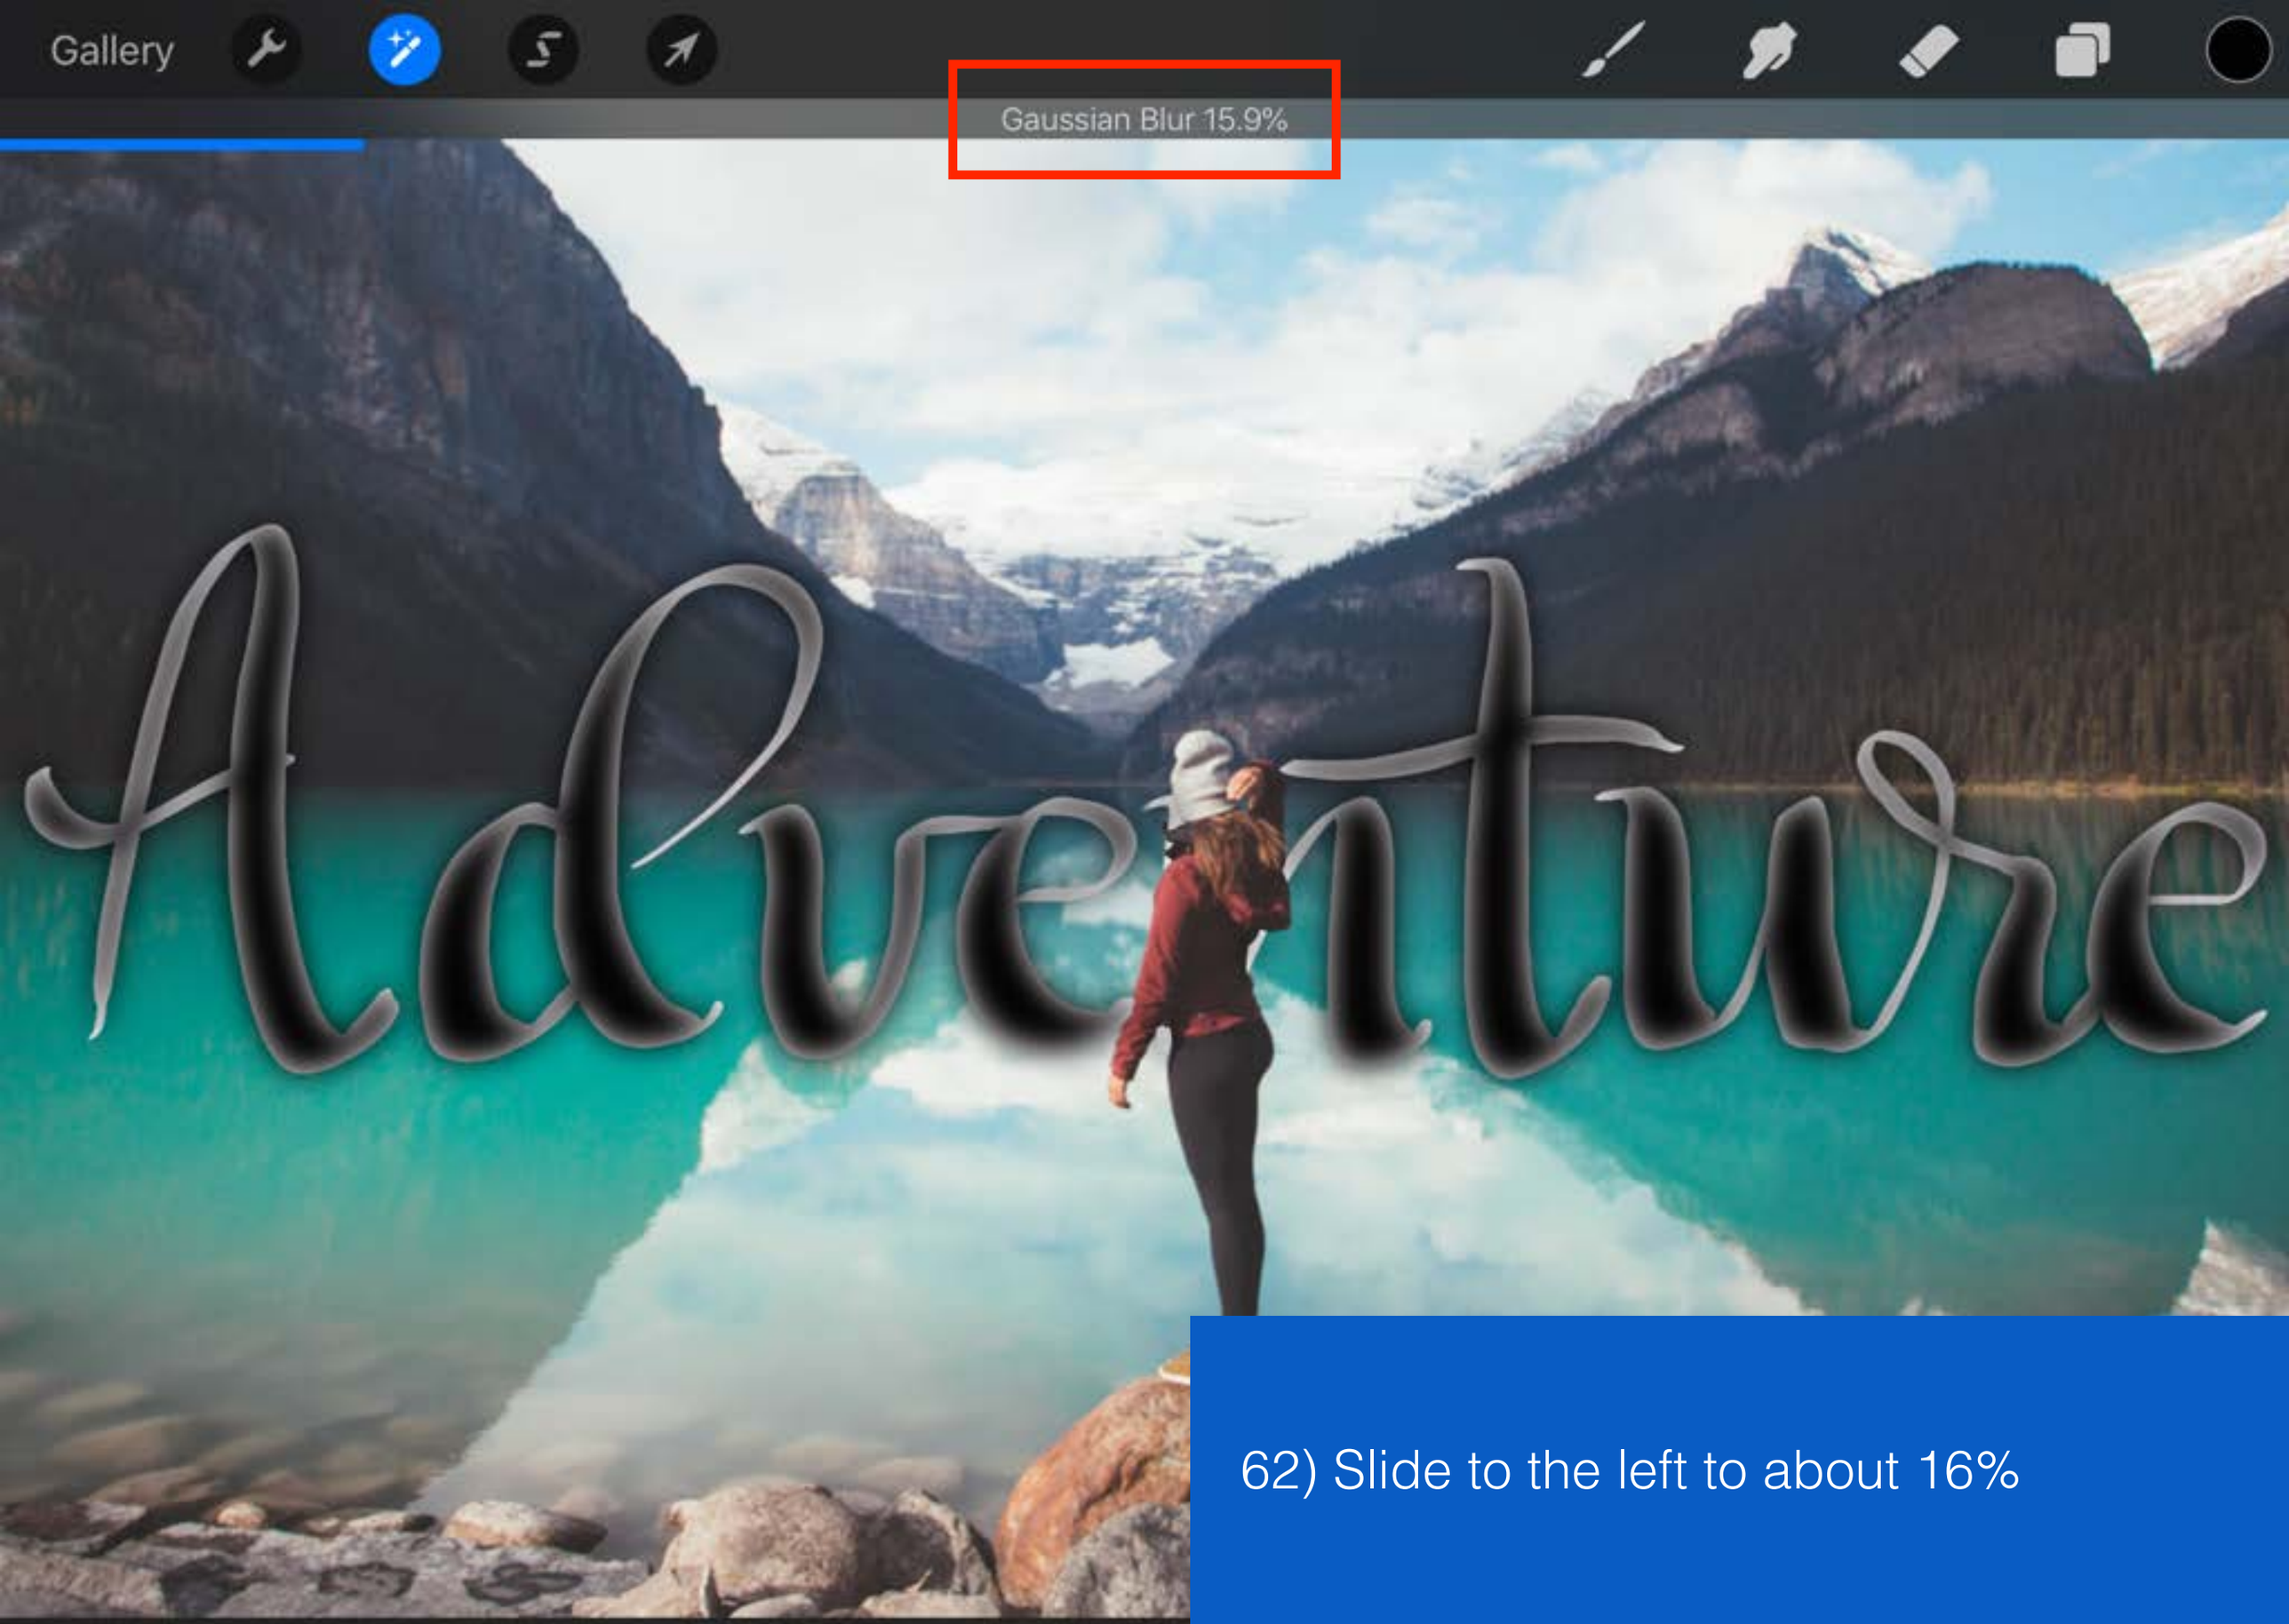
59) Drag the colour and hold and drag to fill in black. (Colour drop Threshold 100%)



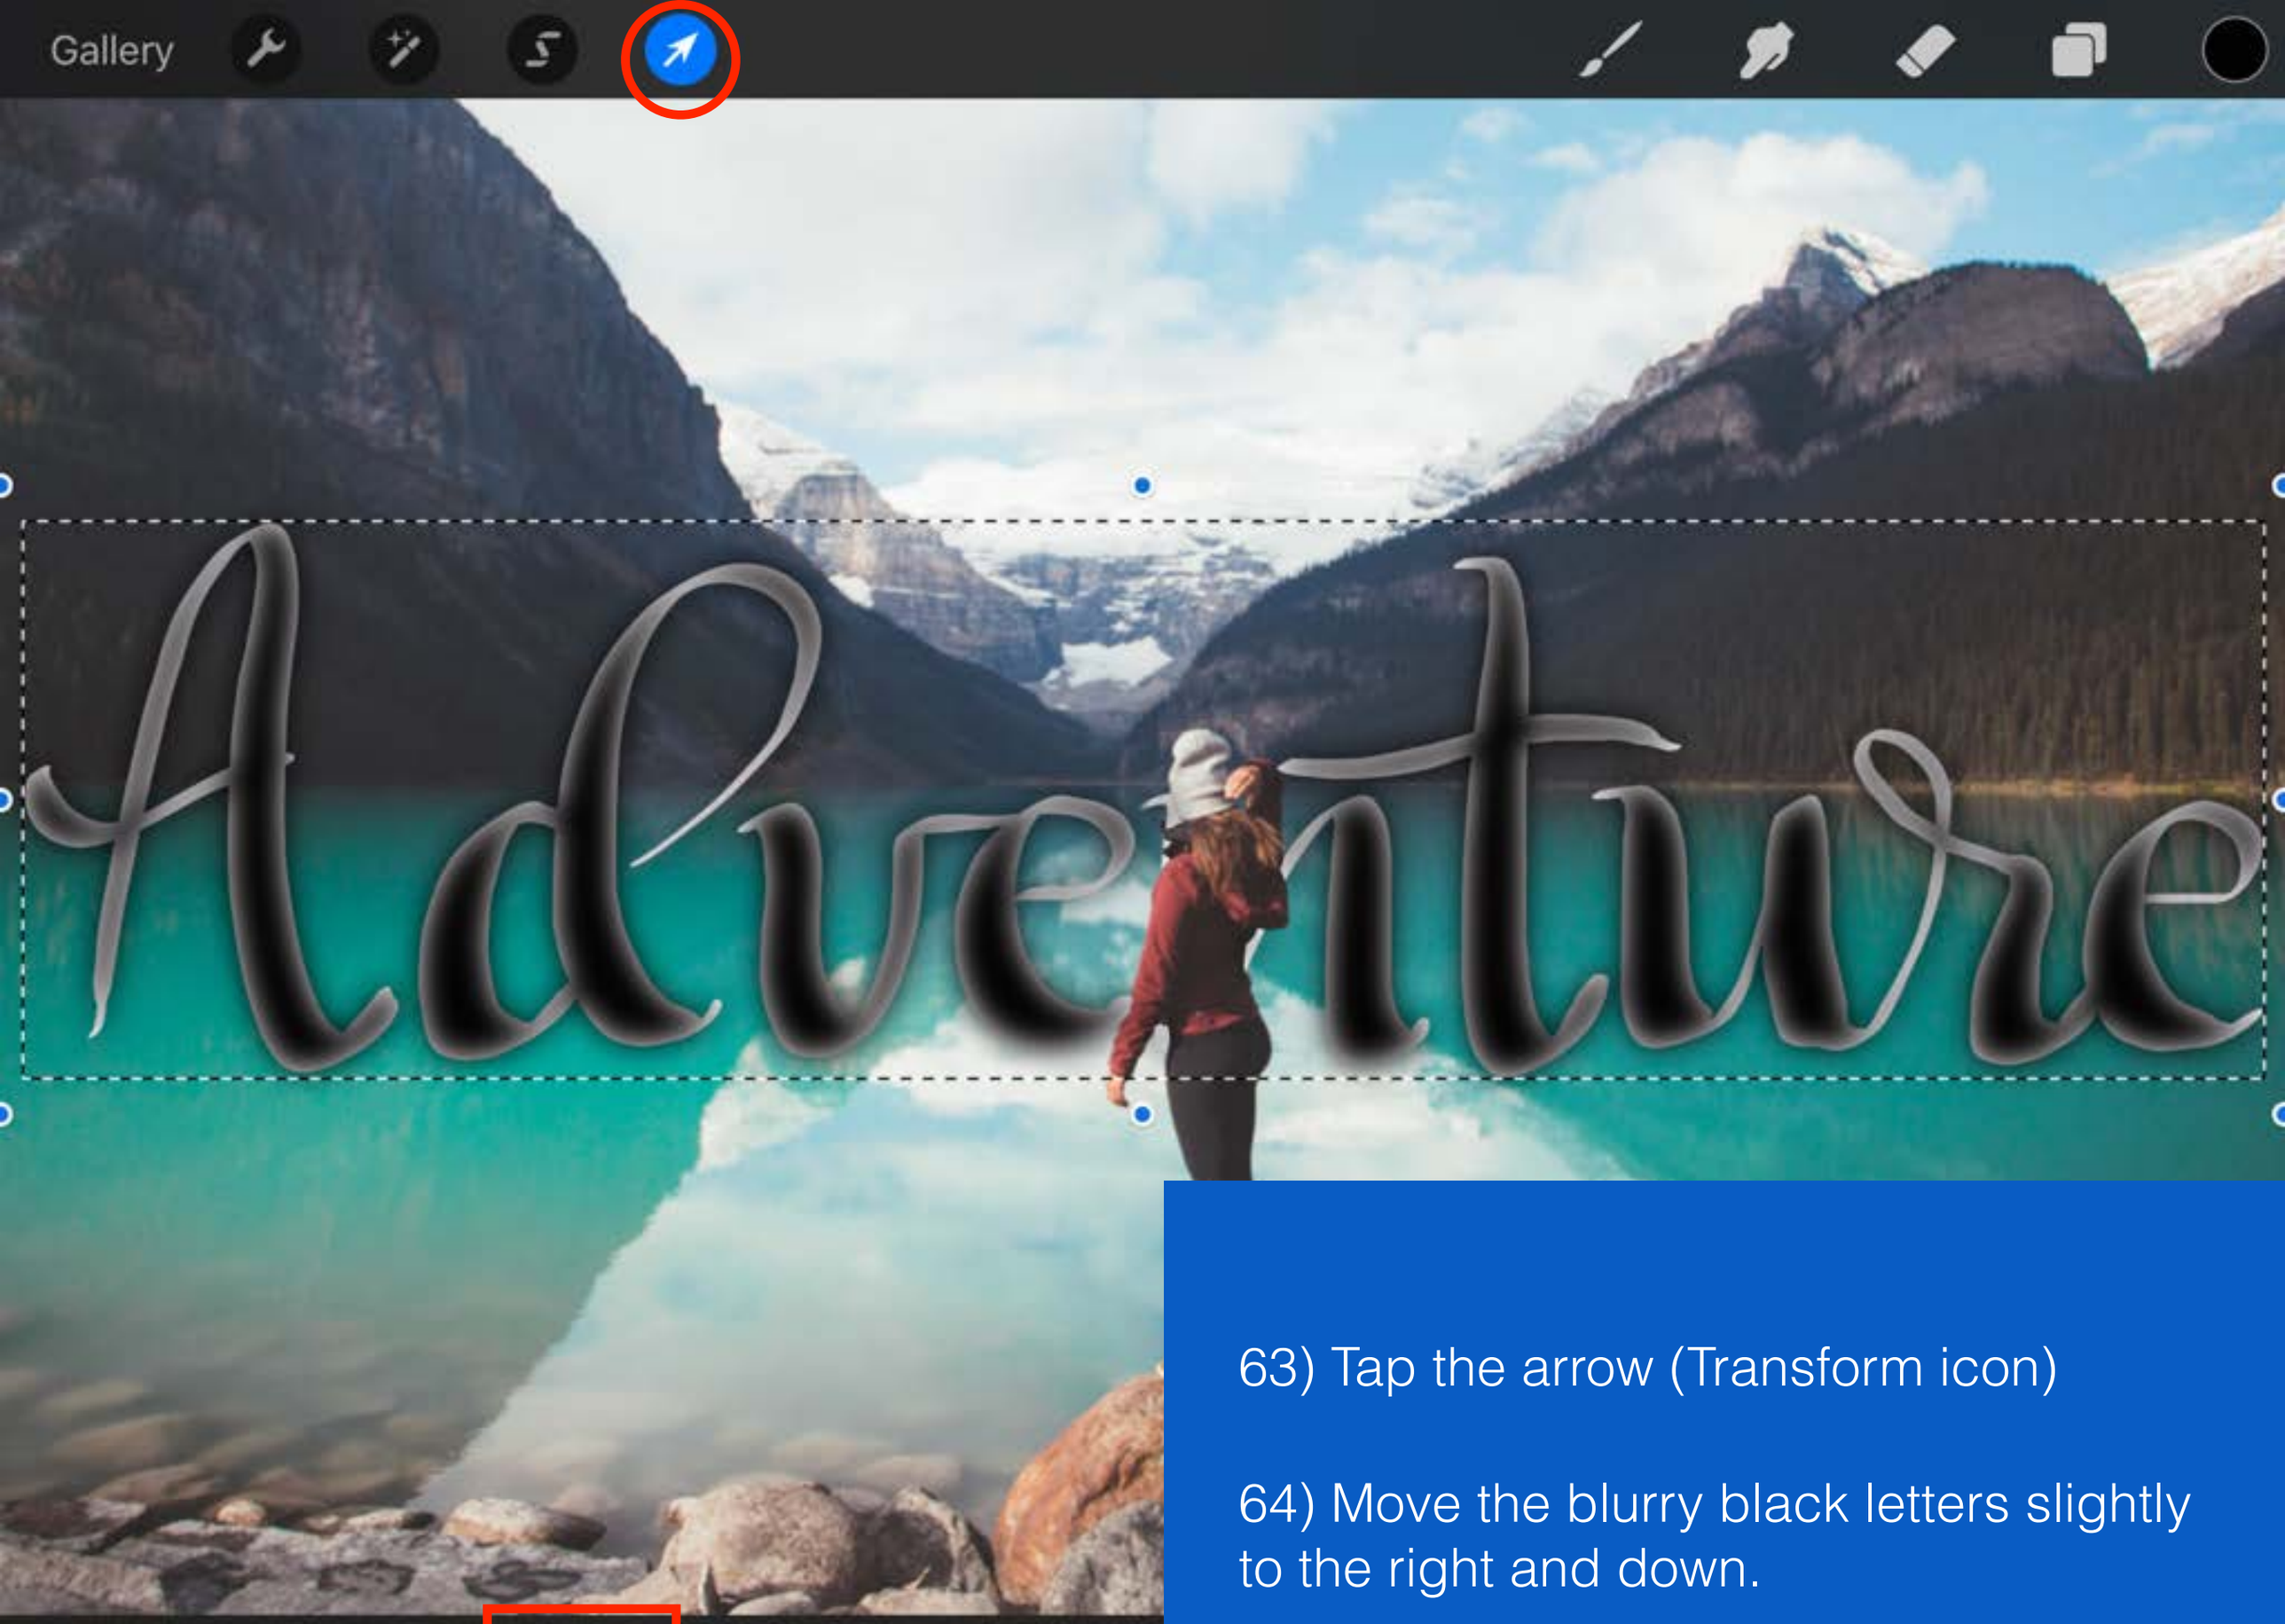


60) Tap adjustments icon

61) Tap Gaussian Blur



62) Slide to the left to about 16%



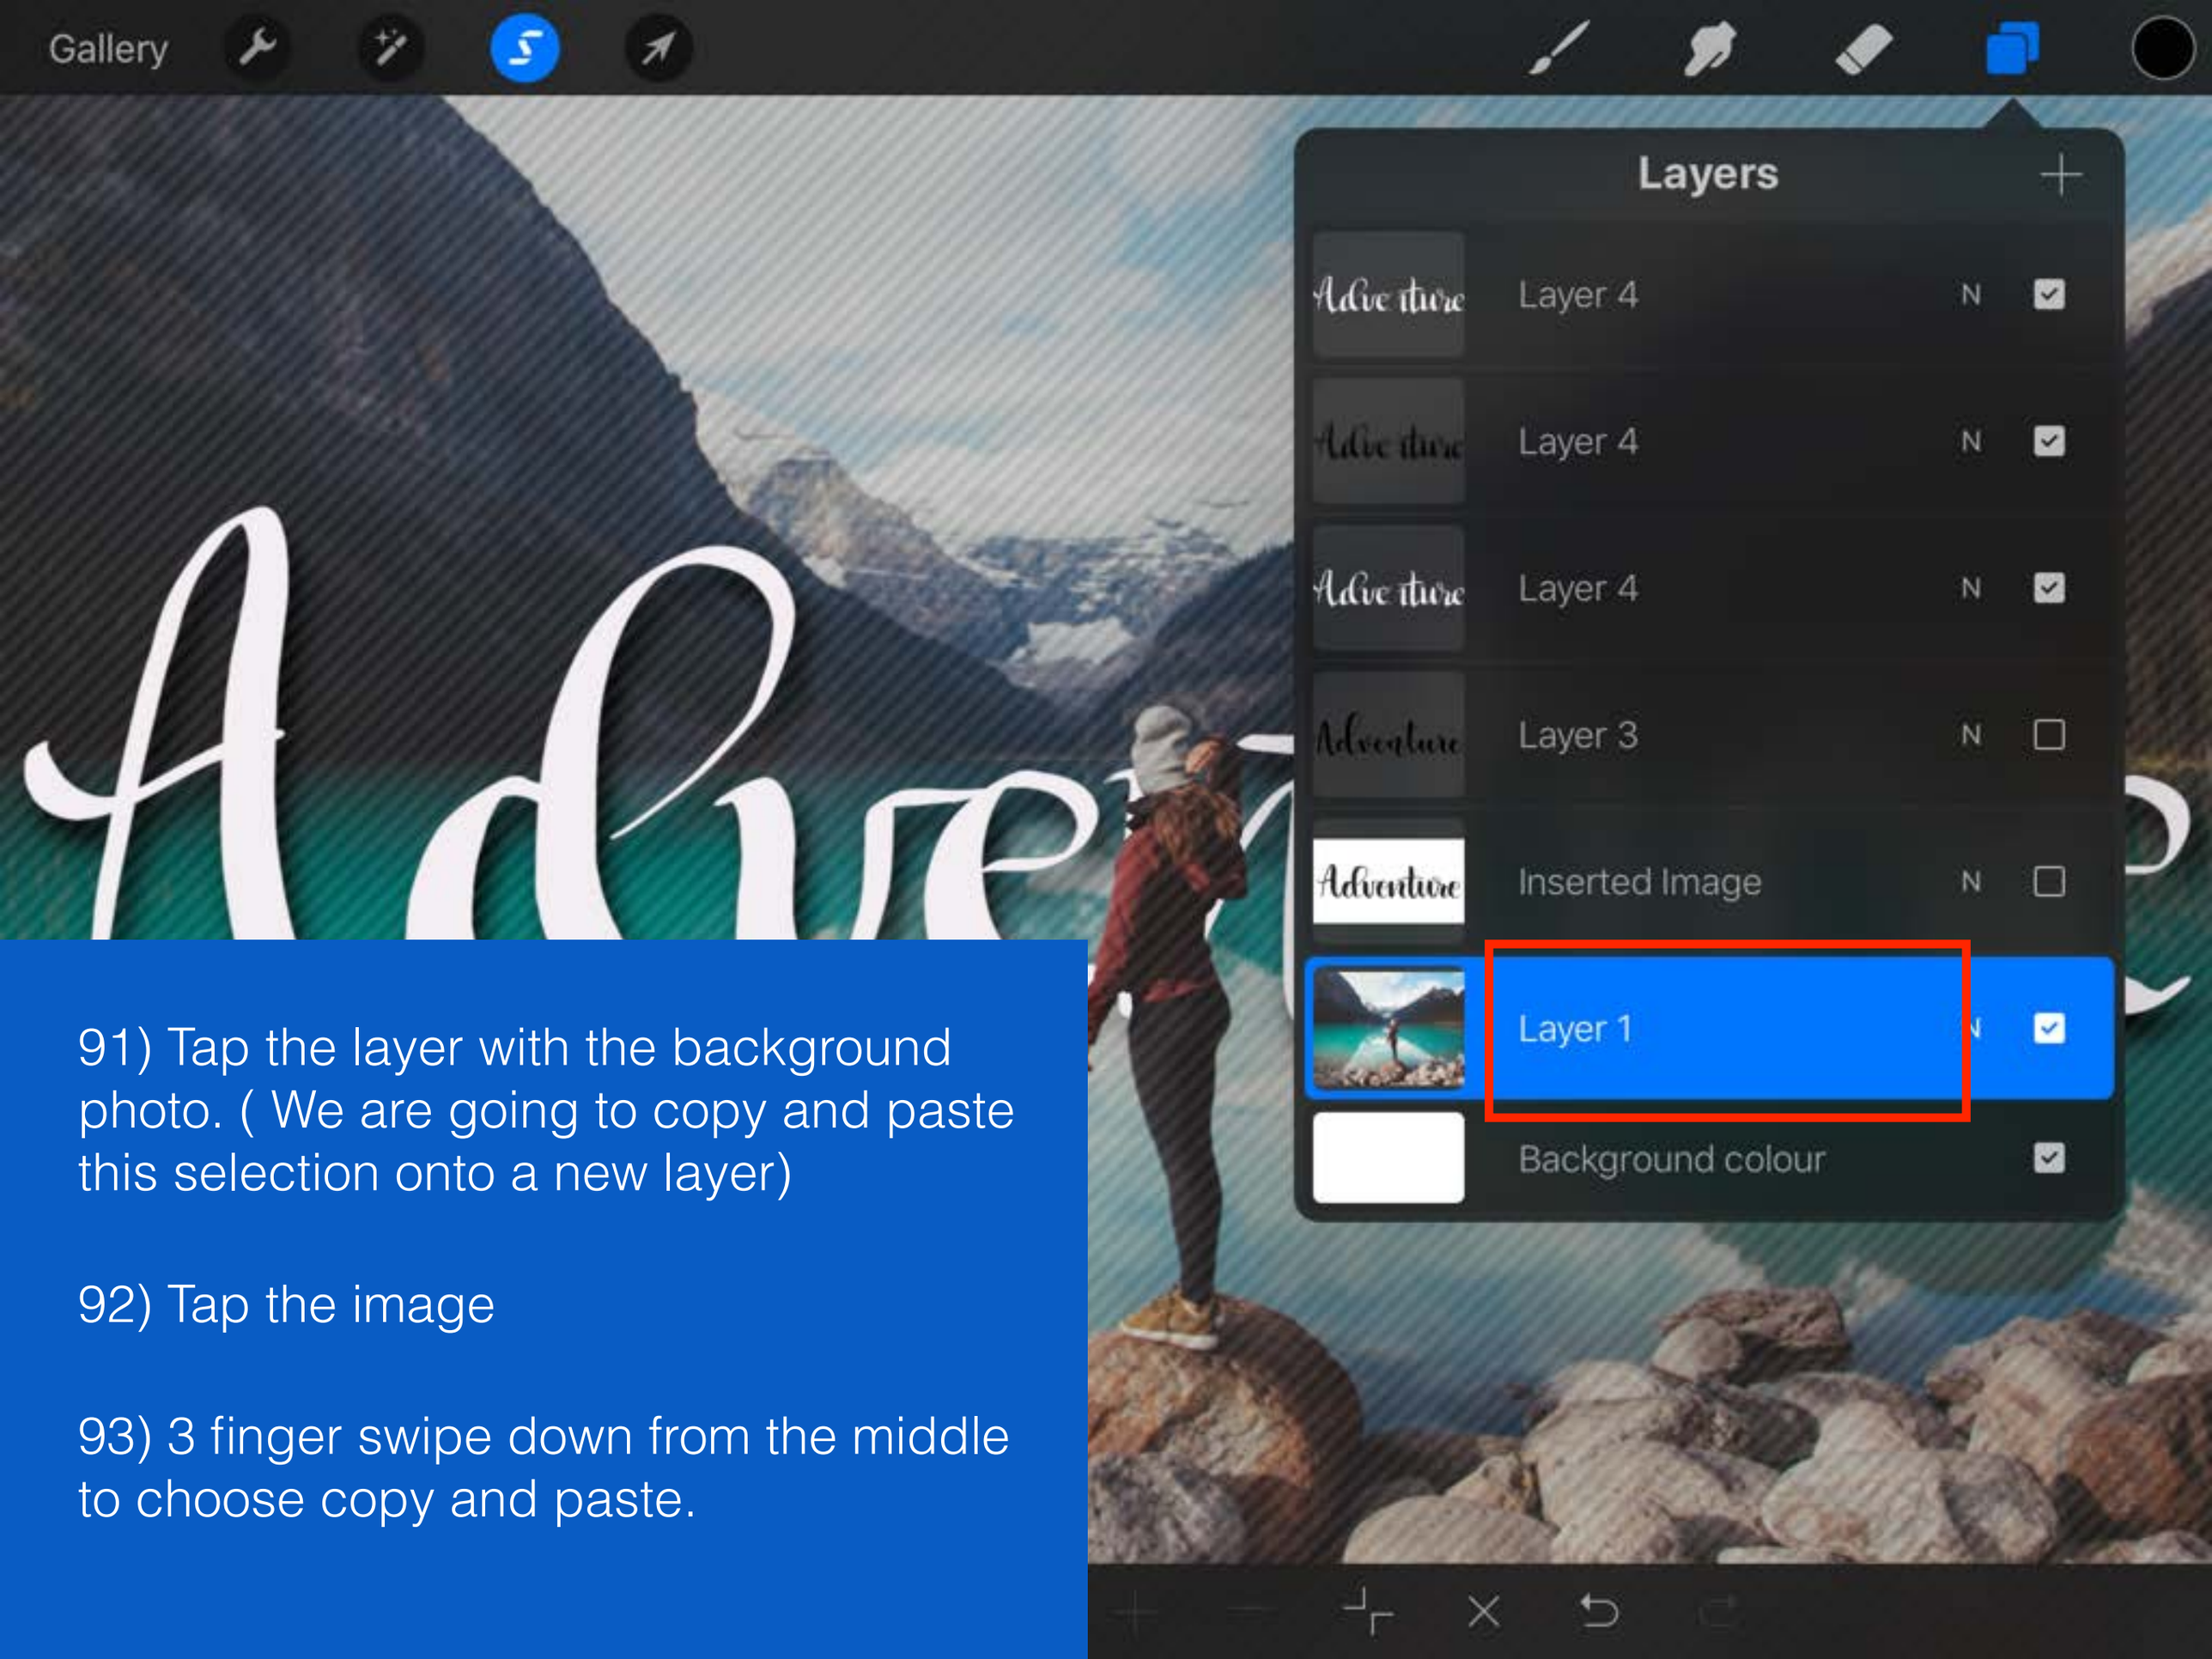
63) Tap the arrow (Transform icon)

64) Move the blurry black letters slightly to the right and down.

88) Move the blurry black text down one layer and reduce its opacity to 50%

89) Select the top layer.

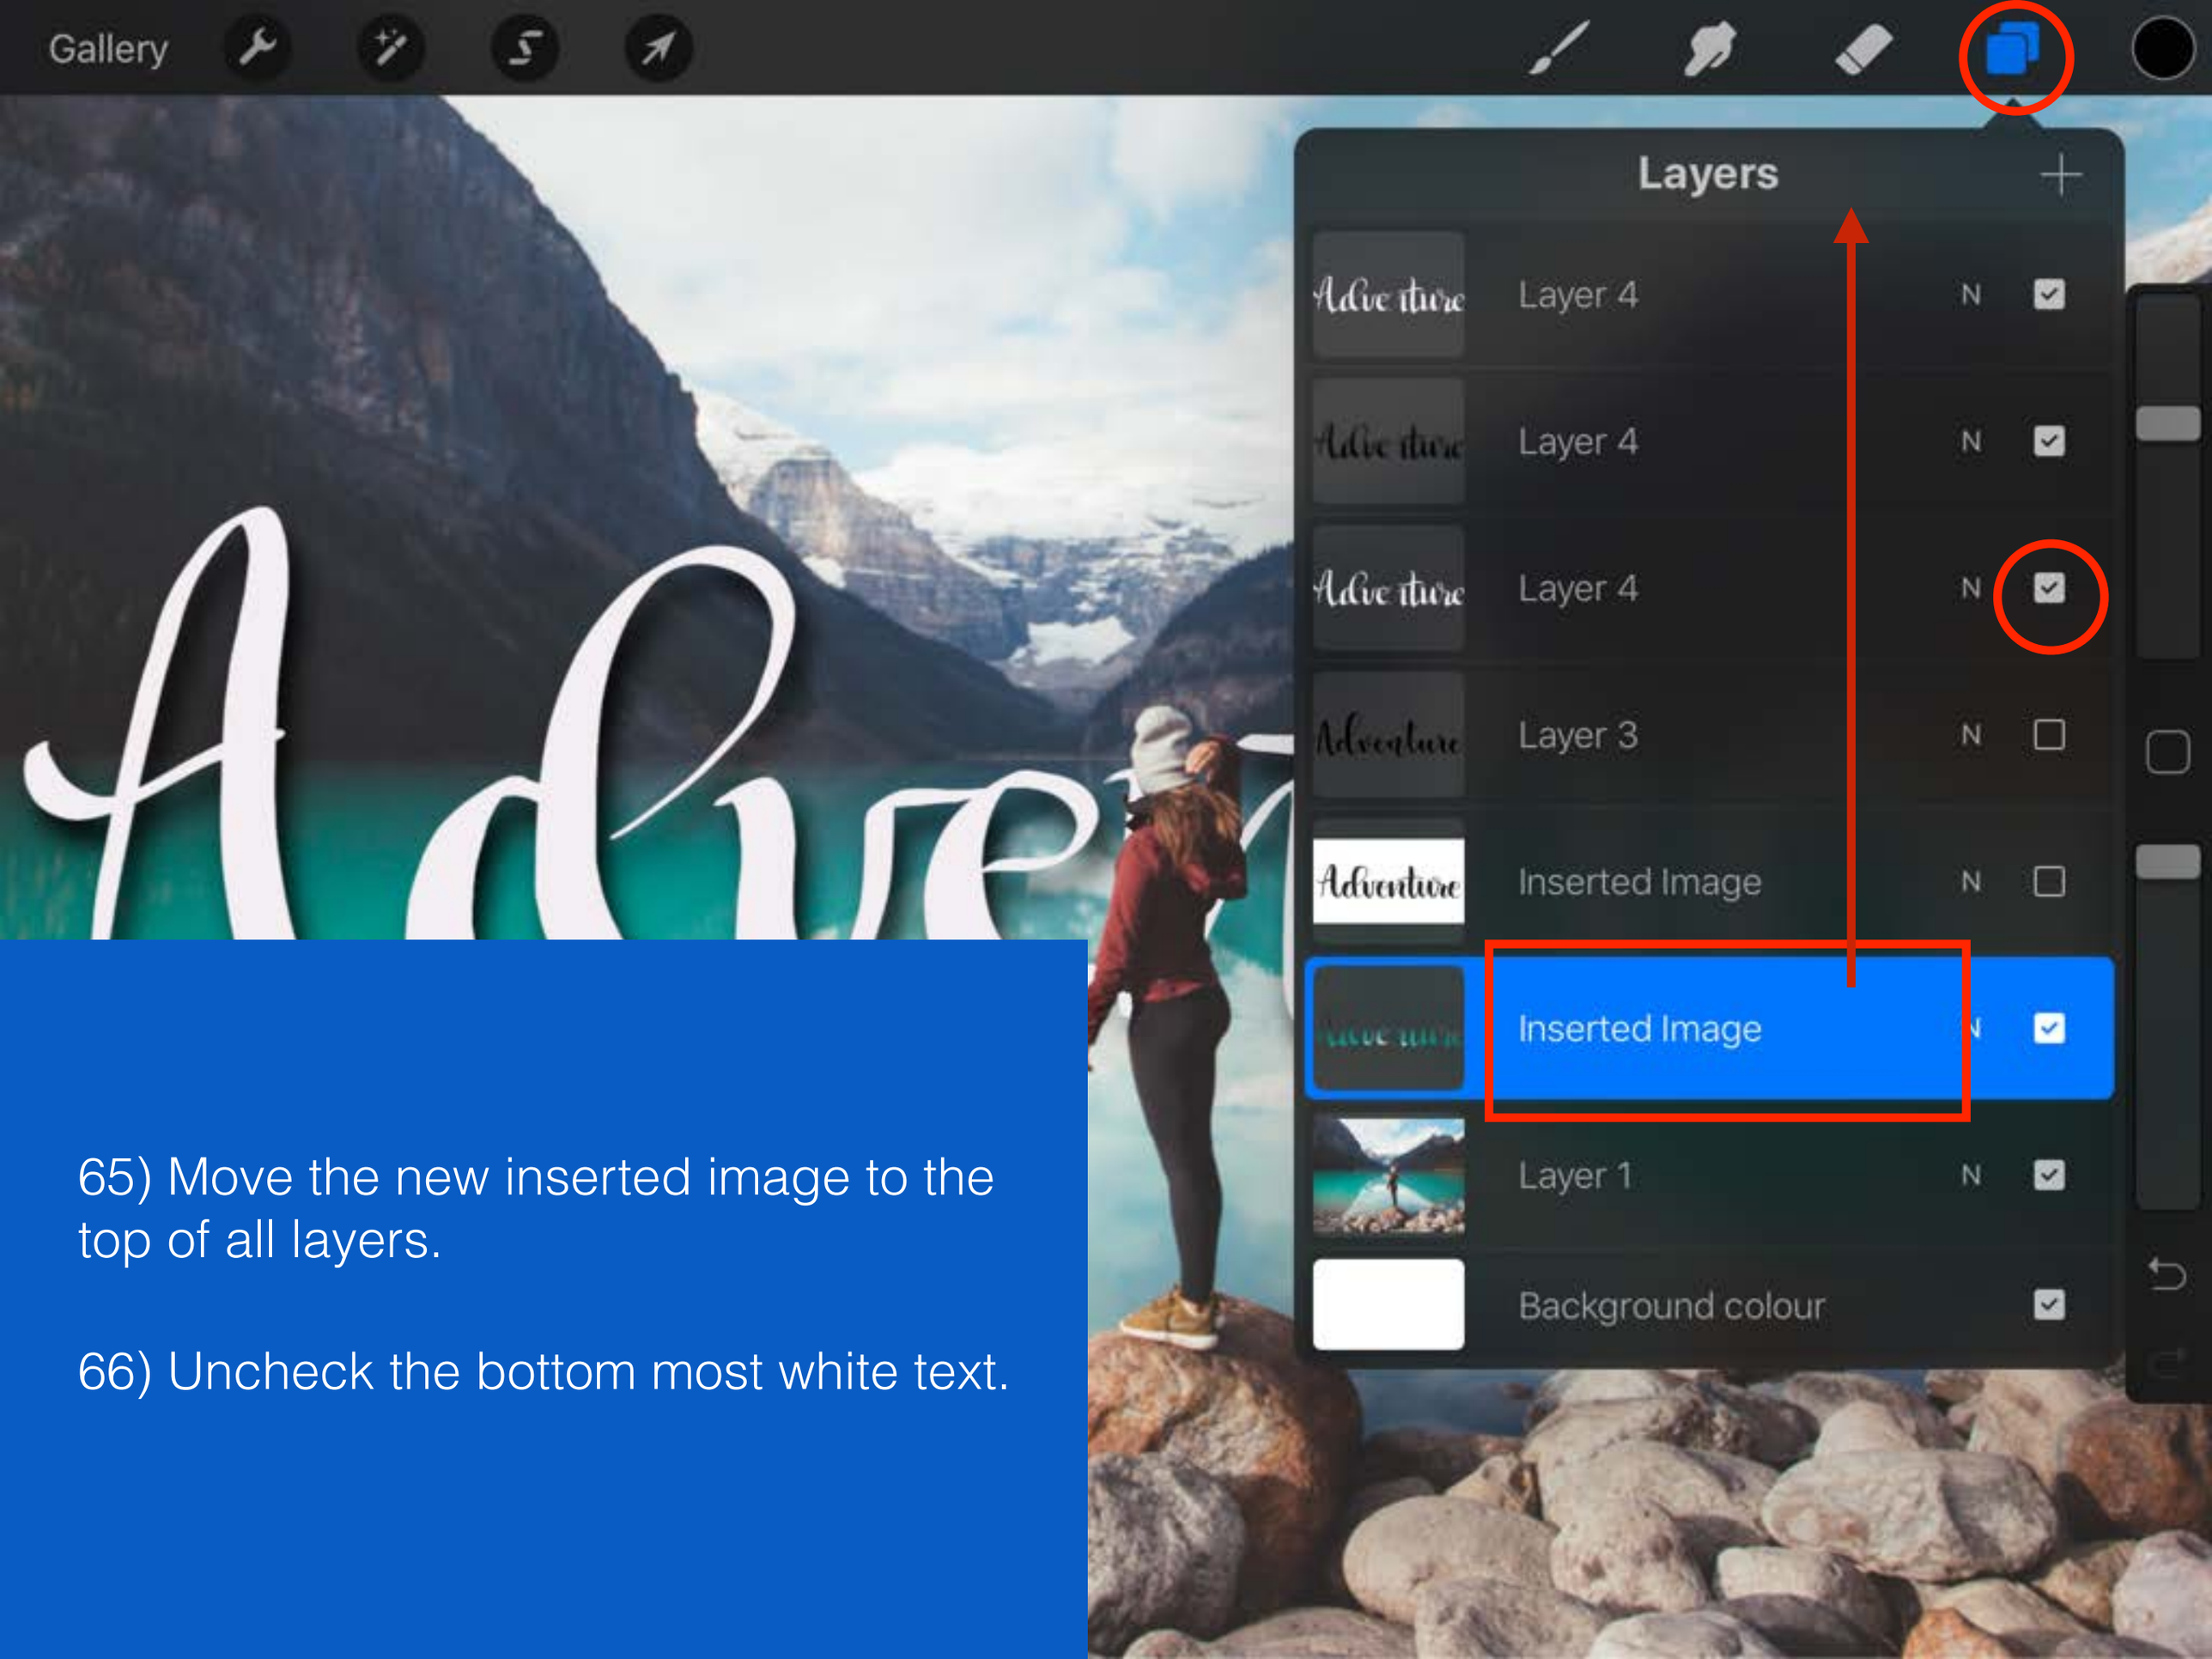
90) Tap its thumbnail and tap the select option



91) Tap the layer with the background photo. (We are going to copy and paste this selection onto a new layer)

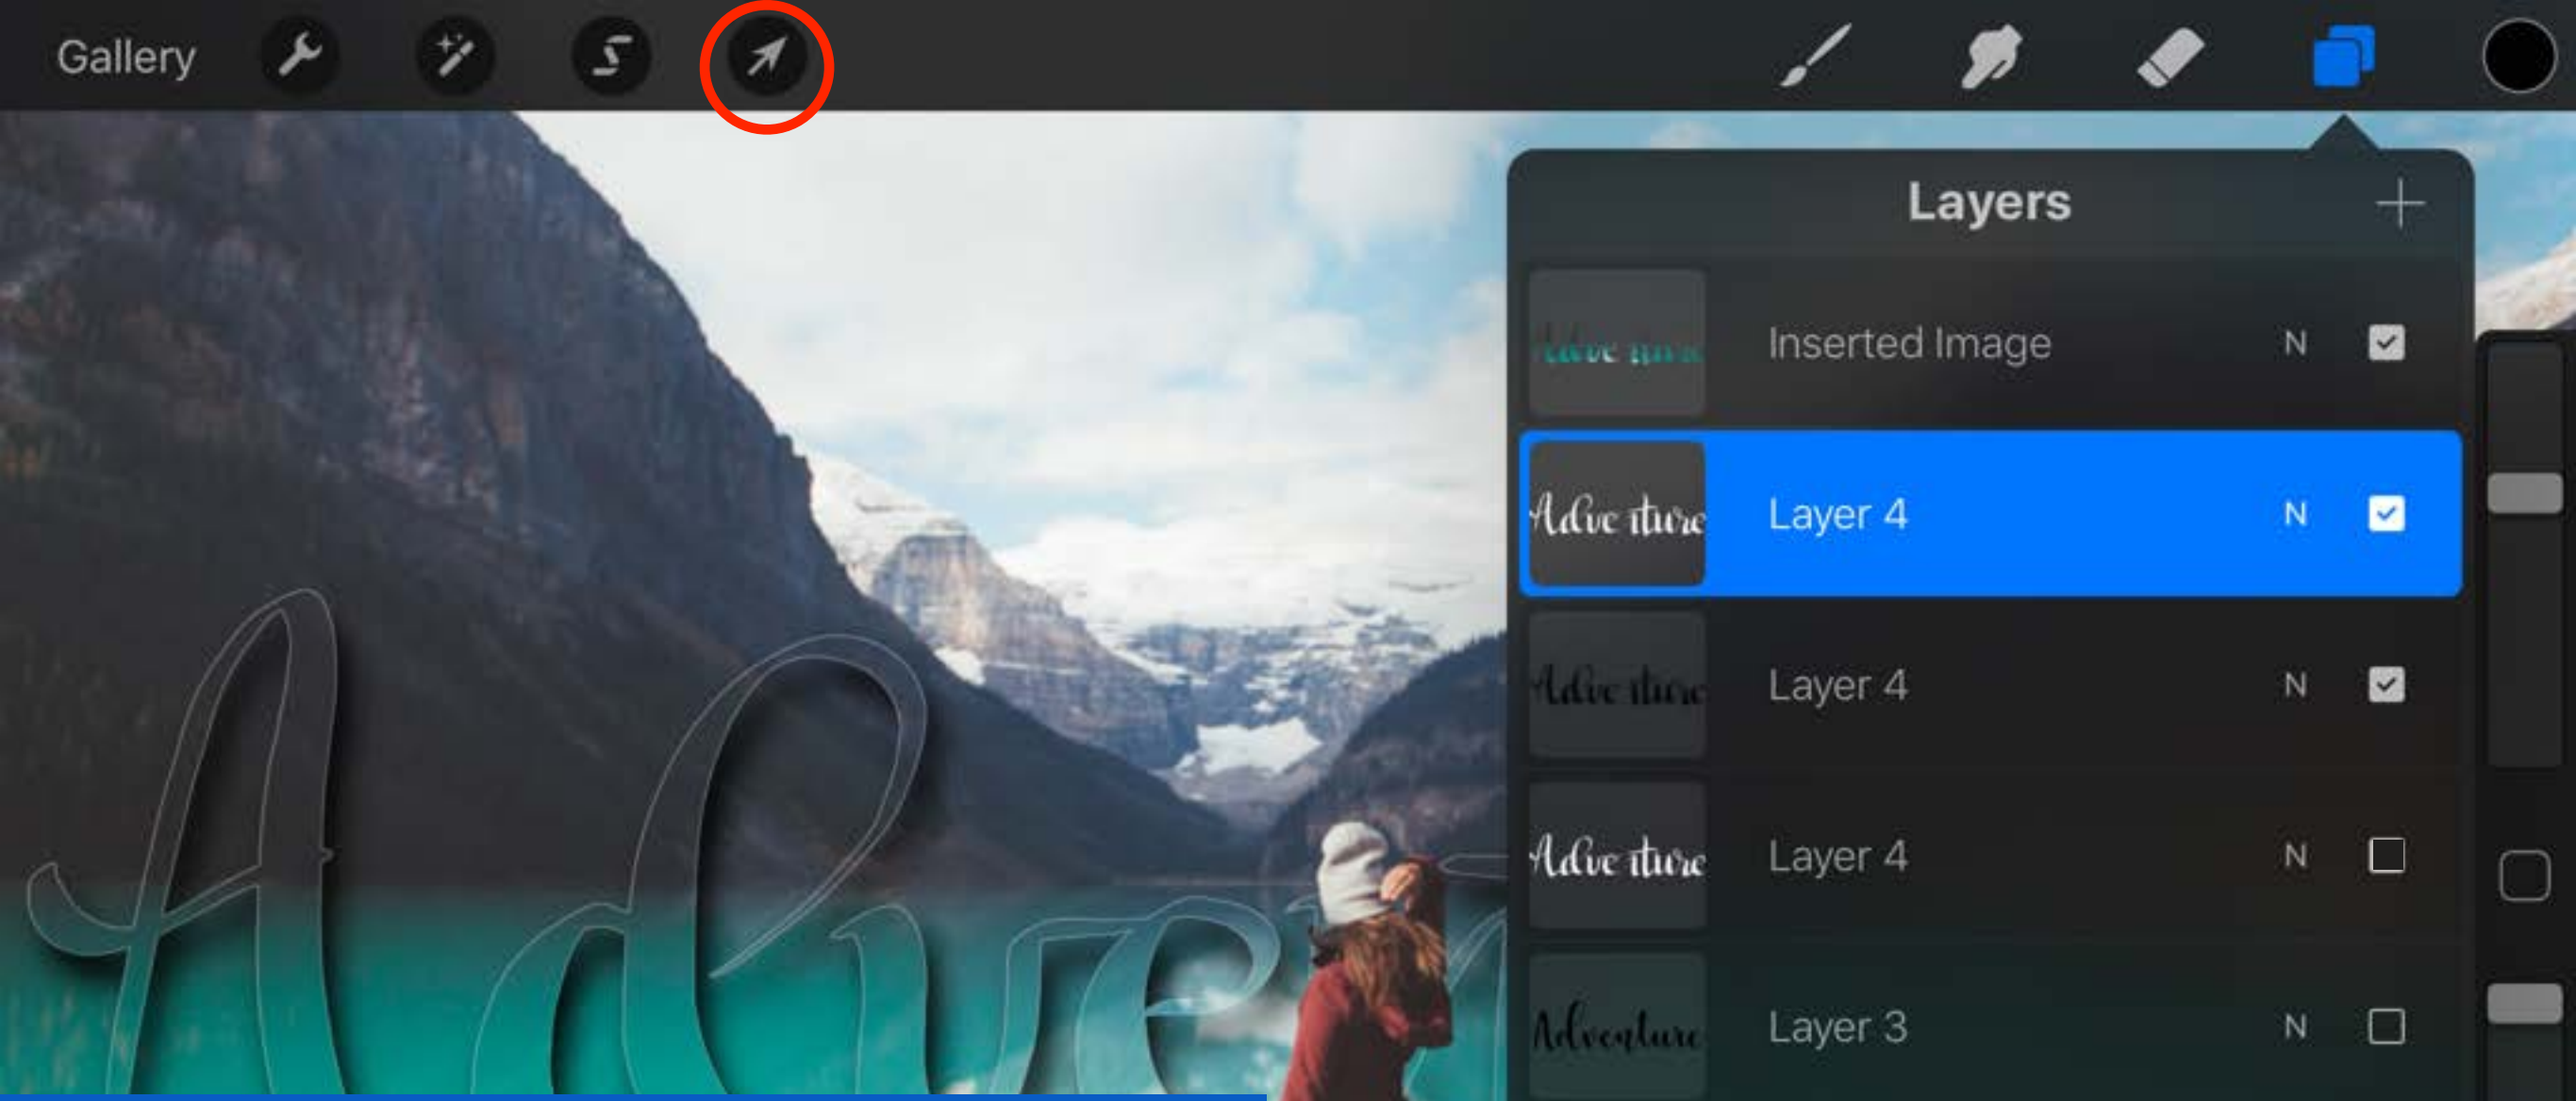
92) Tap the image

93) 3 finger swipe down from the middle to choose copy and paste.



65) Move the new inserted image to the top of all layers.

66) Uncheck the bottom most white text.



67) Select the active white layer under your copy and pasted inserted image.

68) Tap the arrow (transform) tool.

69) Move the white layer up and to the left a little bit.

70) Reduce the opacity of that layer to 30%
